

SCIENTIFIC METHOD REPORT STEPS AND INFORMATION

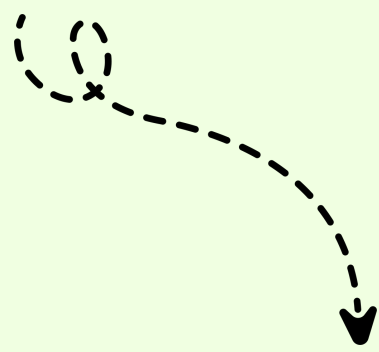

1 Purpose

The purpose of the experiment is to see, or find out what?

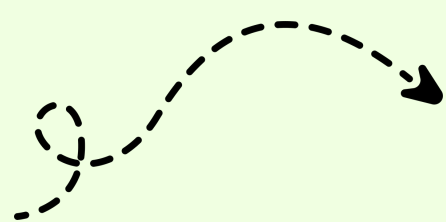

2 Research

In your own words, inform the reader of what you have learnt on this topic.

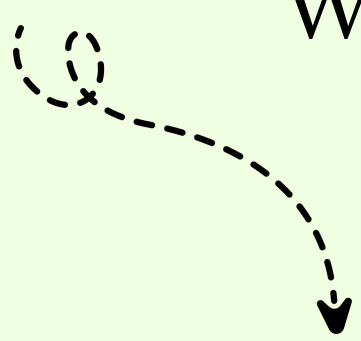

3 Hypothesis

What is your prediction for the experiment?

4 Experiment

What materials did you use?
What steps did you take to put the experiment together?

5 Analysis and Conclusion

Analyze your data. What results do you see?

Was your hypothesis correct? Why or why not?

What would you do differently next time, if anything?
