

Cromar Advanced Septic Systems

Serving our Customers During the COVID-19 Pandemic

Coronavirus is having a dramatic impact on all our lives.

I would like to share an update on what Cromar Advanced Septic Systems is doing to keep our customers and our people safe while continuing to deliver our products and services.

We are following information from global health experts and the Public Health Agency of Canada (PHAC) on preventing the spread of the Coronavirus. We are reminding our employees about frequent hand washing, and we are regularly cleaning and disinfecting our equipment.

The World Health Organization (WHO) indicates, "There is no evidence to date that COVID-19 virus has been transmitted via sewerage systems, with or without wastewater treatment."

Our team is working to continue to serve the needs of our customers during this time while keeping our Service Representatives safe. As such we ask that while many of our customers are at home "self isolating" themselves and their families as requested by the qualified authorities, we ask that you do not interact closely with our service representatives while they are on your property performing service and maintenance to your septic system.

We truly appreciate your ongoing business.
