Venetian Blinds

A venetian blind (or venetian blind) has horizontal slats, one above another. Venetian blinds are basic slatted blinds made of metal or plastic; wooden slats are sometimes used but in the US these are now usually referred to as wood blinds or bamboo blinds. They are suspended by strips of cloth called tapes, or by cords, by which all slats in unison can be rotated through nearly 180 degrees. The slats can be rotated such that they overlap with one side facing inward and then in the opposite direction such that they overlap with the other side facing inward. Between those extremes, various degrees of separation may be effected between the slats by varying the rotation. There are also lift cords passing through slots in each slat. When these cords are pulled, the bottom of the blind moves upward, causing the lowest slats to press the underside of the next highest slat as the blind is raised. A modern variation of the lift cords combines them with the rotational cords in slots on the two edges of each slat. This avoids the slots otherwise required to allow a slat to rotate despite a lift cord passing through it, thus decreasing the amount of light passing through a closed blind. Slat width can be between 16 and 120 mm, with 25 mm being a common width.

Related patents were taken out in England by Gowin Knight in 1760 and Edward Beran on 11 December 1769, but Venetian blinds were known to the French long before then. In 1761, St. Peter's Church, Philadelphia had such blinds.

In the late 19th and early 20th centuries, Venetian blinds were widely adopted in office buildings to regulate light and air. A large modern complex in the US that adopted Venetian blinds was Rockefeller Center's RCA Building (better known as the Radio City building) in New York City, completed in the 1930s. One of the largest orders for Venetian blinds ever placed was to the Burlington Venetian Blind Co., of Burlington, Vermont, which supplied blinds for the windows of the Empire State Building in New York City.

1) Basswood Blinds

As a natural material, basswood blinds provide a healthy and friendly environment for humans. The basswood comes from North-East China. The blinds market is so huge that we have to get enough raw basswood from the Russia and the US. To reassure the users, capture the customers' heart and enlarge our market, our products have passed the tests of FSC standard. The quality have matched SGS, ISO and REACH.

4) Aluminum Mini Blinds

Why choose mini blinds for your home?

Mini blinds, also known as aluminum blinds, are the perfect choice for many rooms and styles. Here's why:

- *Mini blinds are a super low cost options that give you all you need in window functionality.
- *Easy and intuitive light control and privacy.
- *As some of the lightest blinds on the market, aluminum mini blinds are easy to install and operate for years to come.
- *Due to their thin profile, mini blinds are ideal for windows and doors with shallow depth.

What kind of features are available with mini window blinds?

Custom window coverings can be upgraded in more ways than just color and style. Here's just a few that are available with mini blinds:

*Cordless Lift: This popular option provides a hidden control system that eliminates the lift cord on your aluminum blinds and enables the shades to be easily raised or lowered with the touch of a finger.

*Motorized Lift: With a motorized lift upgrade, your mini blinds can be raised or lowered at the push of a button.

Technical Information:

Anti-UV; Waterproof; Fireproof

Width: 0.4 m - 2.5 m

Height: 0.4 m – 5.0 m

Slats Width: 12.5/15/16/25/35/50/89 mm

Slats Thickness: 0.16/0.18/0.21/0.23 mm

Control System: Cord/Wand/Spring/Motorized/Bead

Need components list and more system choice for Al. mini blinds, please contact us now.

5) PVC(Vinyl) Mini Blinds

Why choose vinyl blinds for your home?

Vinyl blinds are the perfect choice for many rooms and styles. Here's why:

*Vinyl blinds are available in a beautiful array of materials, including plaza fabrics, grass cloth, grass weave, stenciled fabrics, tactics slats.

*Vinyl blinds are an excellent choice for rooms where light control is needed.

What kind of features are available with vinyl window blinds? Custom window coverings can be upgraded in more ways than just color and style. Here are just a few options that are available with vinyl blinds:

*Cordless Lift: This popular option provides a hidden control system that eliminates the lift cord on your vinyl blinds and enables the shades to be easily raised or lowered with the touch of a finger.

*Routeless: Want less light? With routeless blinds, your vinyl blinds would not have visible holes for the cord to pass through, meaning more privacy and less light leakage.

*Cloth Tapes: Choose from different styles of fabric to add class to your vinyl blinds. This decorative and stylish upgrade also covers route holes, increases privacy and decreases light leakage.

*Motorized Lift: With a motorized lift upgrade, your vinyl blinds can be raised or lowered at the push of a button.

Need components list and more system choice for vinyl mini blinds, please contact us now.

Window Shades

1) Roller Shade/Roller Blinds

Single Roller Shades with Stainless Bead

What kind of features are available with roller shades?

Custom window coverings can be upgraded in more ways than just color and style. Here are just a few options that are available with roller shades:

- *Cordless Lift: This popular option provides a hidden control system that eliminates the lift cord on your roller shades and enables them to be easily raised or lowered with the touch of a finger.

- *Opacity: This option lets you choose the amount of light you want to enter your room. Choose from blackout and light filtering materials to have better control on light and privacy.

- *Continuous Cord Loop Controls: This option means the cords on your roller shades will be secured to wall or window frame, meaning your shades will have fewer cords on display. A great choice for larger/heavier blinds.

- *Motorized: This option lets you raise or lower your roller shades at the touch of a button. It is ideal for hard-to-reach windows, and households with children and pets, for media rooms and bedrooms.

Double Roller Shade with Stainless Bead

No matter what you buy, we will offer various material choice.

Openness Factor Choice:

100% Blackout

Sunscreen(3%, 5%, 10%, 15% open)

Dim Out

Material Choice:

100 % polyester

Glass Fiber + Polyester

Polymer + Polyester

Why choose roller shades for your home?

Roller shades, sometimes known as roller blinds, are the perfect choice for many rooms and styles. Here's why:

- *Roller shades pull your room together with beautiful and coordinated patterns and solids.

- *Amazingly easy to clean, roller shades are among the simplest of window treatments to keep looking like new.

Outdoor Roller Shades

Outdoor roller shades have 2 main system. One is steel wire rails as the picture above, the other type have a alloy hard rail. Alloy rail type can cost more, but more stronger when faced strong wind. And alloy rail type can be motorized, but steel wire rails have to be manual.

Need components list and more system choice for Roller Shades, please contact us now.

2) Zebra Blinds

Beautifully diffused light and room darkening privacy make our sheer Zebra shades the perfect choice for your living room, bedroom and study.

Zebra shades and blinds, covered with overlapping layers of light filtering and room darkening fabrics, give your home the sleekly contemporary look you love — but with the easy functionality you need in a shade.

What Are Zebra Blinds?

Zebra Blinds

Light Filtering Zebra Blinds (or Shades) are also known as transitional shades. They offer both sheer and light filtering fabrics in the same shade that creates a zebra like pattern. You can raise these similar to a traditional shade, but you also have the option to align the front and back sections for privacy or to allow some light to filter through.

Leave your shades open during daytime hours and gain incredible view-through, close them partially to protect your family and home from harmful UV rays and intense light, or shut them completely at night for the privacy you need.

Features

- Zebra incorporates dual layers of alternating 2 3/4" to 3" semi-opaque and 2" to 2 3/4" sheer woven fabric vanes.
- Zebra Sheer Shades are available in widths of 94" and drops to 94" to provide visual elegance to wide windows and doors.
- Striped fabric across two layers creates an open/close effect, to control light and privacy
- Offered as Light Filtering or Room Darkening
- 10 light filtering colors available
- Continuous cord control
- Aluminum head rail and bottom bar come in Vanilla color for light colors and dark colors it comes in dark brown/chocolate
- Easy to install - all hardware included

Option	Standard			
	Min Width	Max Width	Min Height	Max Height
Continuous Loop	12"	94"	12"	94"
Cordless	18"	72"	18"	72"

Need components list and more system choice for Zebra Blinds, please contact us now.

3) Shangri-la Blinds

Why choose sheer shades for your home?

Sheer shades, also known as horizontal sheer shades, are the perfect choice for many rooms and styles. Here's why:

*As a beautiful and unique window treatment, sheer horizontal shades provide a modern look by combining the functionality of a blind with the beauty of a fabric shade.

*Similar to a blind, the fabric vanes of a sheer shade can be tilted to any angle in order to provide light control. When raised, the fabric is concealed within the sleek, cassette head rail, providing an unobstructed view. When tilted closed, these shades will gently diffuse the light into your room and provide moderate privacy.

Create Beautiful Ambience

Sheer horizontal shades also create a very soft, flattering light. If you're tired of bright sunshine reflecting off of your computer and TV screens — causing glare or even eye strain — choose horizontal sheer shades. Custom made for your windows; they will help you enjoy the full sunshine without the damaging and annoying issues that can sometimes cause problems with high daylights.

What kind of features are available with sheer shades? Custom window coverings can be upgraded in more ways than just color and style. Here are just a few options that are available with sheer shades:

***Cordless Lift:** This popular option provides a hidden control system that eliminates the lift cord on your sheer shades and enables the shades to be easily raised or lowered with the touch of a finger.

***Continuous Cord Loop Controls:** This option means the cords on your sheer shades will be secured to wall or window frame, meaning your shades will have fewer cords on display. A great choice for larger/heavier shades.

***Motorized Lift:** With a motorized lift upgrade, your sheer shades can be raised or lowered at the push of a button.

Features

- Light controlling abilities
- Fabric made by non-toxic materials
- Easy installation

Option	Standard			
	Min Width	Max Width	Min Height	Max Height
Continuous Loop	18"	96"	12"	96"

Need components list and more system choice for Zebra Blinds, please contact us now.

4) Roman Blinds

Why choose custom roman shades for your home?

Roman shades are the perfect choice for many rooms and styles. Here's why:

*Style, style, style! You can choose from a wide assortment of designer roman shade fabrics and patterns to match your decor exactly.

*They bring functionality to the beauty of drapes. Roman shades are easy to hang and operate, making them the easy choice.

*Roman shades give you a wide variety of light control, from light filtering to blackout liners.

Roman Blinds

What kind of features are available with roman window shades?

Custom window coverings can be upgraded in more ways than just color and style. Here are just a few options that are available with roman shades:

*Cordless Lift: This popular option provides a hidden control system that eliminates the lift cord on your roman shades and enables the shades to be easily raised or lowered with the touch of a finger.

*Continuous Cord Loop Controls: This option means the cords on your roman shades will be

secured to wall or window frame, meaning your shades will have fewer cords on display. A great choice for larger/heavier shades.

*Hobbled Fold: In addition to the standard plain flat fold, you can choose to upgrade to a hobbled fold on many roman shades. This means that when the shade is fully extended, it will retain the soft folds or "loops" for a more traditional look.

*Motorized Lift: With a motorized lift upgrade, your roman shades can be raised or lowered at the push of a button.

Roman blinds and shades are more decorative than your average window shades or blinds, and they can be customized to perfection. The easy part of the process is deciding to buy them. The fun part is creating your ideal custom romans and blinds with the numerous style options available. Choosing custom coverings gives you the control and lets you fit your style and even your odd shaped windows.

Need components list and more system choice for Roman Blinds, please contact us now.

5) Honeycomb Blinds/Cellular Shades

Why choose cellular shades for your home?

Cellular shades, also known as honeycomb shades or cell shades, are the perfect choice for many rooms and styles. Here's why:

- *Great style on a budget is quite easy with cellular shades. They bring an elegant finish to a room at an affordable price.

- *They can actually save you money! Cellular shades insulate your home against heat and cold, meaning less money will be spent on energy.

- *You can get optimal light control; simply choose from light filtering or blackout fabrics to suit your needs.

What kind of features are available with cellular shades?

Custom window coverings can be upgraded in more ways than just color and style. Here are just a few options that are available with cellular shades:

***Top-Down/Bottom-Up Controls:** A very popular option that allows your cellular shades to be raised and lowered in either direction to allow for privacy similar to that of a cafe curtain.

Top Down and Bottom Up

***Cordless Lift:** This popular option provides a hidden control system that eliminates the lift cord on your cellular shades and enables the shades to be easily raised or lowered with the touch of a finger.

***Continuous Cord Loop Controls:** This option means the cords on your cellular shades will be secured to wall or window frame, meaning your shades will have fewer cords on display. A great choice for larger/heavier shades.

***Motorized Lift:** With a motorized lift upgrade, your cellular shades can be raised or lowered at the push of a button.

Technical Information

Width: 40cm to 250cm

Height: 40cm to 450cm

Cells Option: Single/Double/Triple

Need components list and more system choice for Cellular Shades, please contact us now.

6) Day-Night Cellular Shades

The Day/Night Shade offers versatility with two different pleated shades in one treatment. The Day/Night Shade includes a sheer shade as well as a privacy or blackout shade. Both shades can be put up to allow nearly the entire window to be seen. You can also let the sheer down to block out some light or let the privacy or blackout shade to block out some or all of the light the window provides. In addition, you can select any combination of this options. The flexibility that the Day/Night shade provides is unmatched.

Measuring Instructions:

Measure the length (Drop) of area to be covered.

We will manufacture exactly the size you order.

Please verify your measurements so the entire window area is covered and allowances are made to assure a custom fit.

Made to order shades are not returnable!

If draperies or valances are already installed be sure your measurement for width allows the shade to fit under the current window treatment.

Day and Night Shades offer you two shades in one. You are able to pull the shade all the way down in order to have a sun filtering shade, or you can pull the shade up and have a blackout shade. The Day Night Shade is a particularly popular product for RV's or Motor Homes. However, they work great in your home. Take a look at the Day and Night shades that we offer and order one for your home or RV today.

*5/8" inch Single Cell Pleat

*Semi-Gloss finish PVC head rail and bottom rail-color coordinate to match shade

*Filter Light, Block Light or any combination of the two

*Room Darkening and Light Filtering sections operate independently

*Let natural light into the room while maintaining privacy

Need components list and more system choice for Day/Night Shades, please contact us now.

7) Pleated Blinds

Why choose pleated shades for your home?

Pleated shades are the perfect choice for many rooms and styles. Here's why:

*Perfect for any light control need, pleated shades are available in transparent, light-filtering and blackout opacities with liners

*With a wide range of colors including whites, subtle neutrals and bold vibrant colors, you can choose designs and textures that are sure to complement your room.

*These shades have beautiful pleats from top to bottom in both 1" and 2" plates and they will re-pleat neatly when raised every time.

Pleated Shades are a great cost saving alternative to cellular shades, while providing a similar look. The crisp pleats retain their shape and are easy to clean. Pleated shades also have a low profile, they stack very nicely out of the way. Pleated shades look great alone or add additional functionality to compliment drapes you may already have.

Many designer fabrics, textures and color choices are available to compliment any decor, and the fabrics also block out unwanted UV rays, making them a great choice for any room.

FABRICS

We offer both light filtering pleated shades and room darkening pleated shades. If you want even more privacy, liners can be added as well. Pleated shades come in a variety of fabrics, colors and patterns to fit your decor, with white showing to the street for uniformity.

Window Shutters

A window shutter is a solid and stable window covering usually consisting of a frame of vertical stiles and horizontal rails (top, centre and bottom). Set within this frame can be louvers (both operable or fixed, horizontal or vertical), solid panels, fabric, glass and most any other item that can be mounted within a frame. Shutters may be employed for a variety of reasons, including controlling the amount of sunlight that enters a room, to provide privacy, security, to protect against weather or unwanted intrusion or damage and to enhance the aesthetics of a building.

Depending on the application, and the construction of the window frame, shutters can be mounted to fit within the opening or to overlap the opening. The term window shutter includes both interior shutters, used on the inside of a house or building, and exterior shutters, used on the outside of a structure. On some styles of buildings it is common to have shutters to cover the doors as well as the windows.

SHUTTERS

Instantly transform the look and feel of your home with high quality, durable, sophisticated shutters. No matter if you know them as plantation shutters, traditional shutters, or California shutters, here at Select Blinds, we have something for every style and budget. Our interior shutter panels are hinged to either side of the window. This allows you to swing open the panels to access the window.

LOUVER SIZES

All our shutters have operable, moveable louvers, so you can control the amount of light coming through and your privacy. Choose from 5 louver sizes for your perfect fit. The sizes range from 2.5" to 4.5". The smaller louver sizes are commonly used for doors and smaller windows. The mid-range size, the 3.5" louver, is the most popular. The larger sizes provide the best view outside when the louvers are open. If you have a great view, choose the 4.5" size.

Basswood Material

PVC Material

CHARACTERISTICS

Vertical Window Treatments

1) Basswood/PVC/Vertical Vertical Blinds

Why choose vertical blinds for your home?

Vertical blinds are the perfect choice for many rooms and styles. Here's why:

*Classic vertical blinds are made of simple yet durable materials like PVC, faux wood and fabric; there's an option to match any decor. You can even get them in mirrored gold or silver!

*If you are looking for a window treatment that is easy to clean, vertical blinds are a great option for you! Simply wipe them down with a clean cloth for a fresh window treatment look.

*These are the most sought after window treatments for sliding doors, patio doors and panels.

What kind of features are available with vertical window blinds?

Custom window coverings can be upgraded in more ways than just color and style. Here's a great one that is available with vertical blinds:

*Stack Placement: Choose how you want to close your blind; you can do either side, split down the center and pull to both sides or close to the center.

Basswood Material

Fabric Vertical Blinds

PVC Vertical Blinds

Features:

- *An optional 3 1/2" valance is available at no extra charge.
- *All mounting hardware and installation screws are included.
- *Valance corner clips are made of clear plastic.
- *Optional rounded valance corners available (add \$5.00).
- *Comes standard with an ivory colored tension pulley.
- *Vanes (slats) are all 3 1/2" wide and are curved (for added stiffness).
- *Heavy duty track system comes standard with self aligning carriers.
- *Limited Lifetime Warranty against defects in parts and workmanship.

Need components list and more system choice for Vertical Blinds, please contact us now.

2. Panel Track Blinds

Description and Features

Completely change your view on verticals with wide-panel Good Housekeeping Room Darkening Panel Tracks. A new designer favorite that's sure to be one of yours, these gorgeous room-darkening fabric sliding panels are available in a wide variety of patterns and solid colors to block just the right amount of light to reduce glare and provide privacy. Cover boring patio and sliding doors with your choice of 3-, 4-, or 5-panel vertical treatments. Each set of sliding window panels is cut to your specifications and custom-made for windows as narrow as 24" and up to 130" wide.

The sleek, narrow track system – manufactured in the US – is available in white and brushed aluminum and blends smoothly with your choice of fabric for a clean, contemporary look. Each panel is weighted at the bottom to keep them aligned and wrinkle-free. The child-safe, cordless wand can be ordered on the right or left, with a coinciding stack.

These panel blinds for sliding doors and windows are truly versatile. You can also use them as a unique room divider to create or separate individual spaces.

Panel Track Blinds

Backed by the Good Housekeeping Seal of Approval

Cordless wand control (must be ordered same side as stack)

Conforms with CPSC child-safety guidelines

Choose from white or brushed aluminum hardware

Made in China

Recommendations and Limitations

Width: 24" to 130"

Height: 24" to 144"

Standard panel overlap: 1-1/2"

There is no light gap between the rail and the panels.

There will be a 1/2" light gap at the bottom of the hanging panels.

Inside mounts: Min. depths: 3-panel side stack: 2-1/2"; 4-panel side stack: 4-1/8"; 5-panel side stack: 4-1/8". There will be a 3/8" light gap on non-control side and a 1-1/2" light gap on the control side of the blind.

Outside mounts: There will be a 9/16" light gap on both the control and non-control side of the blind. To avoid this gap, we recommend increasing the ordered width by 5".

Standard wand placement is on the left or right stack side on the leading end of the first panel. Please specify left stack or right stack when ordering.

Need components list and more system choice for Panel Track Blinds, please contact us now.

3) Fabric Vertical Blinds Alternative

What are alternatives to vertical blinds?

Need to cover a large window, patio door or sliding door but want something different than a standard vertical blind? There are several options.

- *Panel Tracks

- *Sheer Vertical Shades

- *Vertical Cellular Shades

Minimum Width: 26"

Maximum Width: 144"

Minimum Height: 14"

Maximum Height: 144"

Approximate Inside Mount Deduction: 1/4" Width and Height

Minimum Inside Mount Depth: 2 7/8"

Mounting Requirements

Minimum Inside Mount Depth: 2 7/8"

Minimum Inside Mount Depth (fully recessed): 3 3/4"

Minimum Outside Mounting Surface: 2"

Minimum Inside Flush Mount Vanes and Fabric Folds (Pleats): 6 1/4"

Minimum Inside Flush Mount with Channel Valance: 4 1/8"

Minimum Inside Flush Mount with Fabric Wrapped Valance: 5 1/2"

Need components list and more system choice for Vertical Blinds Alternative, please contact us now.

Fabric Window Curtains

A curtain (sometimes known as a drape, mainly in the United States) is a piece of cloth intended to block or obscure light, or drafts, or water in the case of a shower curtain. A curtain is also the movable screen or drape in a theater that separates the stage from the auditorium or that serves as a backdrop.

Curtains hung over a doorway are known as portieres. Curtains are often hung on the inside of a building's windows to block the passage of light, for instance at night to aid sleeping, or to stop light from escaping outside the building (stopping people outside from being able to see inside, often for privacy reasons). In this application, they are also known as "draperies". Curtains come in a variety of shapes, materials, sizes, colors and patterns, and they often have their own

sections within department stores, while some shops are completely dedicated to selling curtains.

Curtains vary according to clean ability, ultraviolet light deterioration, oil and dust retention, noise absorption, fire resistance, and life span. Curtains may be moved by hand, with cords, by press-button pads or remote-controlled computers. They are held out of the way of the window by means of curtain tie-backs. Measuring curtain sizes needed for each window varies greatly according to the type of curtain needed, window size, and type and weight of curtain.

Curtains are a form of window treatment, and complete the overall appearance of the house. Window treatment helps control the ambiance and flow of natural light into the room. The effect of drapery or curtains is best seen in daylight, and with proper indoor light positioning, can look attractive even at night.

We Recommend:

*Light filtering liners allow light to gently filter through the drapery. Room-darkening liners obstruct 95% of outside light, whereas blackout liners obstruct 100%. Note: Light-filtering fabrics will reveal silhouettes to the outdoors at night.

*Panel-height dimension reflects the height of the finished product, including the pleat. Finished drapery length is recommended to be 1/2" off the floor.

*Choose a split draw if you have two panels that you'd like to part in the middle and stack individually at each side of the window. Alternatively, a one-way draw will allow panels to stack together at one end.

*For added variety and dimension, you can match these drapery panels with our Classic Roman Shades or add optional traversing drapery hardware.

Considerations:

*Lining is strongly recommended to protect your draperies from sun and heat damage. In the case of silk and linen draperies, it is a must.

*This product is sold as panels. For a pair, buy two and choose a split draw.

*These draperies will come with built in pleats that will create gentle folds below when mounted to the rod, so simply order the exact width you want to cover.

When ordering the decorative rod upgrade, a 3 1/8" ball finial will come for each end of the rod. The finial width is not included in the width ordered.

Child Safety Information

This product does not have accessible cords, and therefore is safer for places where children or pets may be present.

Warranty:

With the assurance of the Blinds.com Warranty, you can trust that this product will last and provide added value and beauty to your home.

Need components list and more system choice for Window Curtains, please contact us now.

Smart Home Decoration System

Home automation is building automation for a home, called a smart home or smart house. It involves the control and automation of lighting, heating (such as smart thermostats), ventilation, air conditioning (HVAC), and security, as well as home appliances such as washer/dryers, ovens or refrigerators/freezers. Wi-Fi is often used for remote monitoring and control.

Home devices, when remotely monitored and controlled via the Internet, are an important constituent of the Internet of Things. Modern systems generally consist of switches and sensors connected to a central hub sometimes called a "gateway" from which the system is controlled with a user interface that is interacted either with a wall-mounted terminal, mobile phone software, tablet computer or a web interface, often but not always via Internet cloud services.

Window Treatments in Smart Home System Field

A Smart Phone/Pad Control All

Thanks for the help of various motors, we can make it realized that all our window treatments can be insert into Smart Home System.

If you buy from us, we can do all the shakedown test on our workshop. The system and products will be available directly when you receive them.

Prospect

While there are many competing vendors, there are very few worldwide accepted industry standards and the smart home space is heavily fragmented. Popular communications protocol for products include X10, Ethernet, RS-485, 6LoWPAN, Bluetooth LE (BLE), ZigBee and Z-Wave, or other proprietary protocols all of which are incompatible with each other. Manufacturers often prevent independent implementations by withholding documentation and by litigation.

The home automation market was worth US\$5.77 billion in 2013, predicted to reach a market value of US\$12.81 billion by the year 2020.
