

Project Management

1st Expert were contracted in 2021 to help complete a detailed Pre- Qualification Questionnaire in respect to a major infrastructure project.

Having spent many years employed by a major UK construction company as a Project Director, and being the Project Lead on the compilation of a series of Pre construction documents, tender preparations and Client interviews, for the potential of contract awards for the business in respect to major Infrastructure Projects.

I have gained an extensive knowledge on what is expected of the Principle Clients and the evidence needed to promote the suitability of the offer.

The art is to understand the question and directly answer it concisely without flair, I have witnessed in the past, returns that are the opinion of the individual and not what it requested.

As the answers are generally scored by the Client, it is imperative that the best answer is given with evidence to ensure the best result.

The Company was successful and are now fully engaged in the Project delivery.
