

Magna Track ST

Exhaust extraction system for emergency stations with fewer runs

MagnaTrack ST is designed for stations with fewer runs. The free-hanging exhaust hose is equipped with a swivel attached to a balancer, which moves on the guide track. A switch on the track separates the entire hose assembly from the vehicle in a one-step process, minimizing stress or strain from the vehicle to the exhaust hose or ceiling brackets. MagnaTrack ST is available in lengths from 6 to 12 m (20 to 40 ft) and it fits vehicles with low mounted exhaust pipes.

- Capacity: 1 vehicle per system
- Exhaust pipes: low level tail pipes
- Normal exit speed up to 15 km/h - 10 mph
- For reverse-in (or drive-through)
- Optional automatic start/stop device that offers:
 - Practical control of fan start/stop
 - Safe control of air quality (source ventilation automatically starts when vehicle engine starts)
 - Simple programming
 - Approval for radio equipment acc. to EC directives, FCC (USA) and IC (Canada)

Product name	Magna Track ST
Further technical data	Nozzle Ø: 160mm Nozzle hose length: 0,6m
Diameter, hose (mm)	125
Note	Including: Aluminum track (1), Mounting brackets for 2.4 m distance (2), Rubber stop (3), Sliding block (4), Balancer (5), Swivel (6), Hose connector, Exhaust hose (7), Low level nozzle (8), Electro-magnet assembly (9), Anchor plate (10), Disconnection switch (11), Transformer (12)
