CHILD CARE PROGRAM (CCP)

Compendium of Insights

OPPORTUNITIES

FOREWORD

My association with Child Care Program (CCP) Steering Committee for more than a decade gives me an immense pleasure not just because of impact we are creating but also having a learning from each day and season's experience. Though I am a researcher by profession, this platform helped me and other members to do an action oriented research on social issues especially on child labour in agriculture. Further, certain value systems in seed supply chain are proven possible through lateral learning across member companies. I am so happy that seed companies are though rarely meet for a business agenda, they are glad to converge and explore opportunities to work for social issues. I would quote CCP multi stakeholder approach as one of the most successful platforms globally and surely it gives lot of confidence for others who would like to work in similar situations. I am also delighted to publish this Handbook by Monsanto as a compendium of insights of a decade that help seed industry as a reference document while they make an attempt to address child labour issue.

Dr. DAVULURI VENKATESWARLU

Glocal Research and Consultancy NGO Hyderabad

As a member of Child Care Program (CCP) Steering Committee for last 6 years, what I realized is that solutions do exist where problem prevails. We need to be patient enough to probe root causes for social problems and develop local solutions. As an education focused NGO, CCP platform also helped me to pass through a rich experience of partnering both in problem and solution which transformed me to travel towards a constructive dialoguing. The constant confidence the members have been building up over the years, boosted my energy to work more aggressively on child labour issue. Our association with seed companies and other members of CCP Steering committee, gives an immense satisfaction that child labour, a social issue of such a big magnitude in India too has a solution if we consistently challenge the issue. I congratulate Monsanto for nicely documenting varied solutions for wide range of social problems.

Dr TN REDDY

Center for Applied Research and Extension (CARE) NGO Hyderabad

It is needless to say that Child Care Program efforts to address child labour and associated issues, are unparallel to compare with any best models globally because of its practicability in approach and reliability in execution. When CEASE started their initial efforts to address child labour issue, I had foreseen that it takes multiple years to find out a radical solution for this issue. After me becoming a member of CCP and participating in very transparent discussions, completely changed my views that we can easily find out solutions if we have strong intentions to address them. With the release of this CCP Compendium of Insights, my dream of sharing wisdom with rest of the world, is becoming truly true. I appreciate all member companies and look forward to their continued association and collaboration towards a change that won't change easily in developing countries like India.

B. KRISHNA MURTHY NAIDU

Former CEO, CEASE (Consortium of Employers Associations for the Elimination of Child Labor)

Hyderabad

Can I think about this critical issue?

Can I act due to many challenges?

How to address this social issue?

Can I build a team to work on this?

can I convince
 so many
stakeholders?

Can I sustain a program to address such a big problem?

Cohesively
Collectively
Consistently
Constructively
Collaboratively

Please read through next few pages Insights of CCP

Passionate People are Real Drivers

Move from Fashion to Passion

Cross functional team working together

Collaboration with NGOs for new ideas

Dedicated team to execute on field

Steering committee to drive the program

Description:

Building a passionate team from different functions brings more ownership to drive the program and to surface issues. Timely reinforcement and recognition for the team develops passion among the team.

Team to Own and Act

Bottom-up, Follow-up, Speak -up and never give up

Take views of communities to strategize actions

Create an open environment to surface issues

Follow-up to have reliable data

Consistency in approach gives sustained results

Description:

Acknowledging views from the ground and strategizing actions brings a spirit of ownership among team members to identify root causes and to provide solutions.

Tools for Training

Capacity building has a greater importance and impact

Field orientation matters a lot

Classroom discussions to bring alignment

Let team to do role plays in the field

Pre-season training to share last years experiences

Description:

A comprehensive training on legislation, policies, implications, tools and location-specific issues both in the classroom and on the field demonstrations helps a lot.

Sensitization versus Audit

More sensitization efforts lead to fewer audit requirements

Farm labour training

Women and community training

School children and teacher training

Farmer family training

Description:

A proactive communication to local stakeholders (farmers, farm labour, communities, children, teachers, NGOs etc) at various crop stages brings more clarity on why to do, what need to do, how to do and when to do.

Customized Communiqués

Need to be audience and situation specific

Human Rights Policy in the form of calendars

Wall paintings in public places

No child labour message through book stickers

Village processions to create momentum

Description:

Right communication tools in vernacular languages and with pictorials help explain specifics to absorb and later share.

Women Social Mobilizers

An innovative way to reach communities

Training for women self help groups

Training for farm labour

Training for farmer family members

Training for school children

Description:

Women are effective trainers of other women as they can easily access and share information in rural communities.

Farmer to understand a Bigger Picture

To behave like an ethical business partner

Apprising farmer on policies and local legislation

Explaining about ethical business to farmer families

Educating neighboring farmers on code of conduct

Description:

A broader level explanation on implications of social issues helps farmers to move from just being aware to being committed.

Children are Key Stakeholders

Engage them often even during vacation

Create enthusiasm for children to learn

Encourage children to volunteer for change

Make children into safety ambassadors

Engage children in sports during school holidays

Description:

Reaching out to children will help to influence their thoughts from childhood and help them to convince their parents to have concerns for their future.

Strategies in High Risk Areas

Never step out or step back, embrace the challenge

Support government initiatives

Collaborate with seed industry

Engage business partners where they are

Share program details with other stakeholders

Description:

Perseverance and collaboration with key stakeholders will lead to new ideas and solutions to address key concerns in high risk locations.

Local Solutions Work Better

Solution lies where problem exists

Facilitate discussions with farmers to bring out issues

Build confidence to suggest solutions

Make labour agents part of the program

Description:

A strong belief that every problem has a solution makes us handle any tough situation by providing location specific and local solutions through a collaborative approach.

Audit versus Coaching & Counseling

Facilitate shift from "Complaint to Compliant"

Create a positive environment to align thought processes

Give a broader perspective on the issue

Be down-to- earth to understand reasons for non-compliance

Involve farm labour to get solutions

Description:

Shifting auditor approach from policing to hand holding brings a behavioral change in farmers and other stakeholders.

Location Maps

If we plan, we can walk and win; If we don't, we will run and lose

Location-wise details on farm spread help to guide and get more output

Description:

Planning of field visits helps tremendously to bring efficiency and effectiveness.

Follow-up on Child Labour is the Key for Success

Closed cycle phenomenon

School visits to get more facts

Parents visit to counsel

Greet children for their regular attendance in school

Description:

Through follow-up visits to schools, parents and field, companies can identify root causes and ascertain facts to strategize actions for the next season.

Documentation Strengthens Program

Program visibility brings more credibility

Data collection through situation specific formats helps to get the correct data to make proper interpretations and inferences

Description:

Having thorough and relevant data, as well as timely reporting through structured processes, helps to understand where we stand.

Multi - Stakeholder Approach

Diversified thoughts and convergence add value to program

CCP Steering committee periodically reviews the program and provides diversified solutions

Description:

Having relevant partners from business, NGOs, industry and government gives a wider perspective of issues and creative solutions. Forum helps to conceptualize, design, execute, evaluate and review program.

Field Level Consultation Helps

Identifying root causes to develop effective solutions

Involve farmers and other local stakeholders while framing strategies

Description:

To connect well with local stakeholders helps to understand issues and solutions better.

Model Village (Zero Child labour Village) Honoring Program

A community level recognition

Even small gifts for children encourage them to think big

Description:

Appreciating children for their parent's efforts, creates more bonding within the program and helps to sustain it further.

Bridge Schooling Helps Child Labour to return to their childhood

Accelerated learning leads to rehabilitation

Special schools have a unique curriculum and life supporting skills to expose children differently

Description:

Returning children to the school in their home village should be the goal.

Farm Safety Culture

Constant messaging and user-friendly tools lead to an impact

Involve farmers to barricade unsafe conditions

Personal protection for corn labour

Personal protection for honey bee handling

Personal protection for pesticide exposure

Description:

Developing tools to communicate and follow farm safety, drive us toward building a safety culture.

Snake Bite Anti-Venom Program

A creative model for caring communities

Saving snake bite victims

Description:

A community caring solution through methodical planning and execution of emergency handling for a systemic problem like high risk snake bites in rural communities.

Extended Human Rights Initiatives

A holistic approach makes program self sustained

School sanitation facilities

Providing potable water for communities

 $Per sonal\ hygiene\ kits\ for\ children$

Involve communities in community initiatives

Description:

Building village infrastructure around education, water, sanitation, women empowerment helps to reduce child labour incidences.

Disclaimer:

This is published to share experiences of Child Care Program (CCP) with different stakeholders. Need to understand each of these insights before practicing in relevant situations. Monsanto is publishing this only in the interested of the public and has no responsibility for consequences thereupon.
