OWNER OPTIONS CONTENTS

OWNER OPTIONS OVERVIEW

OWNER OPTIONS OVERVIEW

The ***OWNER OPTIONS*** menu allows the owner to set various parameters on the ***ONIS*** which will provide the users with a consistent secured device across the fleet.

Most options are a “check box” to enable / disable and each option has an adjacent help option with the “ ? ”

Help document.

Set check box's to enable / disable options.

OWNER OPTIONS MENU

IMPORT GEOFENCE SPEED ALERTS

IMPORT GEOFENCE SPEED ALERTS

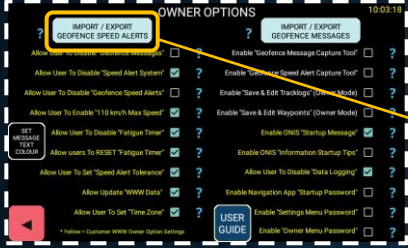

The “Import Geofence Speed Alerts” allows the owner to import data that has been configured on a PC.

Typically, this data will have been configured using the PC version of ***OziExplorer*** and then saved in the OziExplorer waypoint format.

The owner can then import this waypoint data and the ***ONIS*** will then perform the calculations to convert the waypoint data into the CSV format required by the ***ONIS***. The owner has the choice of either appending the data to the existing data set, or replacing the data entirely.

Each option has a “ ? ” which outlines the requirements of the import data file.

IMPORT GEOFENCE SPEED ALERTS
