

# ISO TOPS INDIA METAL TRADERS

Iso Tops India Metal Traders is newly incorporated in 2019 but has its business rooted since 2005 under the name of Mossam Steel Center. It started with the aim of directly importing & stocking material from reliable manufacturers.

We are actively importing, stocking & selling Sheets, Coils, Plates, Round Bar, Hex Bar, Square Bar, Pipe, Flange of Nickel and Nickel Based Alloys as our clients need. Our main focus is material quality and timely delivery at competitive prices.

We keep adequate stock of material at all times and supply the same with original heat markings and manufacturers mill test certificates.

We have an affiliated sales representative based in Dubai who looks after our Middle East clients

The company's clientele include companies from various sectors like defense equipment manufacturing, chemicals, petrochemicals, automobile, engineering companies, pharmaceuticals, cement manufacturers, nuclear power plants, aerospace.

#### We have our mastery in

- Stainless Series 200, 300, 400
- Duplex Stainless Steel 2205
- Duplex Stainless Steel 2507
- Alloy 20, Hastelloys
- Inconel, Monel Nickel based Alloys

Becoming an end to end platform for Non-ferrous metal solution.

Building long term and reliable relationships with customers, suppliers, employees and other stakeholders

We strive to put our efforts in gaining excellence in satisfying customer needs by delivering in time quality products at competitive prices.

Our company's core value is to establish and maintain quality systems and procedures in all our operations and business by focusing on Team Work, Accountabality, Trustworthiness, Ethics.

Stainless Steel Flanges are ideal for applications that require the use of tiny high-pressure pipes. It is slipped over the pipe and then welded both inside and outside to provide sufficient strength and prevent leakage. Due to their outstanding stress corrosion cracking resistance, these Flanges may perform effectively in acidic and corrosive conditions.

**Types:** Weld Neck, Slip On, Socket Weld, Threaded, Orifice, Forged Seamless, Ring Joint, Lap Joint, Stubends, Blind Flange

Stainless Steel Circles & Rings have varied characteristics like smooth functioning, high strength, exclusive finish, unsurpassable performance, etc. These are suitable for applications that require a robust, anti-oxidation quality product. These are also nonmagnetic, have excellent formability, and is easy to fabricate, making it an excellent option.
