

Officially Signed and Paid the deposit for Han's Laser Cutting Machine

By the end of May, AForge have officially signed the contract with Han's Laser, the estimate delivery time for our 7 Axis 3 Stations Laser Cutting Machine is in the END of August. Meanwhile, we are currently developing gauge with Han's Laser, and we will send a group of engineers to Han's Laser to learn the operations and daily maintenance of the machine. With this new equipment, AForge will be able to cut three different types of tubes at the same time. AForge will be able to increase the daily capacity, and prepare all sizes of the tubes with different cutting in the near future.

Bringing New Management Team to DeZhou & Nantong Factory.

Kenith Chang, the Special Assistant to G.M, has started managing DeZhou & Nantong Factory in early June, due to the resignation of Nori Chang -Vice G.M of Nantong & DeZhou Factory with personal & family issue. Kenith has

already took over all the departments, and started with new management system in Nantong. Currently he has team of seven talented leaders to assist him, Starting on the right hand Side:

- ▲Mr. Bai, Hydroforming & Polishing Expert from Shenzhen, Quality Control leader.
- ▲Mr. Hsieh, the second best CNC Engineer in Shenzhen factory.
- ▲Mr. Su, production management leader.
- ▲Mr. Chiang, Hardware & Technical Support.
- ▲Mr. Tseng, one of the most experiences tubes development technician in Shenzhen.

▲Mr. Li, one of the best on site Engineer who has been with AForge over 20 Years.

▲Mr. Hu, Technician.

Overview of Nantong Factory

▲4 Axis CNC Machine

▲1000T Hydroforming Machine

▲CNC Department

▲ 3 Machines Station

Kenith's goal is continuing improve the overall quality, delivery lead time, and most importantly systemized all aspects of the factory to catch up or even surpass the ShenZhen Factory.
