

**New Machine in Progress**

**ShenZhen- Laser Cutting Updates**

We have sent several engineers to the laser cutting manufacturer to learn the programing, maintaining, working principle and all the other necessary knowledge for the incoming Laser Cutting Machine. Our laser cutting machines are already built, and now being tested at the manufacturer. Machine is expected to arrive in the follow weeks.

**ShenZhen- New Automatic shearing machine**

We have a new automatic shearing machine in house! This shearing machine can cut all extruded materials accurately, and smoothly. The machine is expected to help both of our forging factory, and tubing factory to lower the defective ratio.

The product on the right side is cut by the new machine, the cutting mark is more smooth and smaller compare to the cut from our old machine.

## Nantong – New Monster in house

On August 7, our new annealing oven arrived. This new oven came with the latest oven technology. The manufacturer promised that this oven, all tubes will be equally annealed, unlike the old oven, tubes are not always equally annealed! With this new oven, we will be able to have more control to our manufacturing process.

## Vietnam Progress: New Team member in house

We are very delighted to announce our team is growing steadily. Two new employees have joined us in August.

- Xiao Jiao, Management trainee, will be based in Vietnam. Jiao used to work for one Timberland boots production factory for several years. She will help us for the upcoming Vietnam factory.
- A-Ru, Management trainee, will be based in Vietnam. HR trainee, she will help us to grow our team.

### New staff training program

- Our new staff are having training course in China for the upcoming Vietnam factory. These training courses are included company's product, manufacturing process, purchasing and so on which helps new employees to familiarize the required knowledge.
