

WEB-ENABLED 2-WAY AUDIO/VIDEO ENTRY SYSTEM

Our Vandal-Resistant Design keeps your building SAFE.

VISION-1700

17" Touchscreen Entry System

Webb Electronics has pioneered a new entry system that will transform the access-system industry. The Webb Vision-1700 is a web-enabled entry access system specifically design for multi-residential buildings and office towers. Compact and modern, the Vision-1700 truly brings together form and function with a gesture-controlled touch screen, multi-lingual voice prompts and complete integration into the Webb Vision product line.

The Webb Vision-1700 features a NEMA 4 and IP66 rated stainless steel body equipped with 17" vandal resistant touchscreen display. Its seamless integration with the Webb Vision ecosystem establishes this model as the perfect choice for both outdoors and indoors applications.

The Vision-1700 has all the key security requirements you would expect from a state-of-the-art system including lobby door and/or elevator floor restrictions and scalability to incorporate future reader technologies. Optional features include mobile phone app integration for two-way video calling, parcel delivery and amenity booking and QR code temporary access for visitors.

Product Highlights

- Linux O/S Web based architecture
- Standalone or networked

VISION-1700

Vision-1700 Entry System

All events are logged with optional motion video and audio capture for every visitor. Accessing the Entry Phone. The Resident may: Allow Lobby and/or Elevator Access or Reject the Caller via the App or a by pressing 6 or 9 for a conventional audio only call.

Communications

The Entry Phone provides three modes of communication, PSTN, VOIP and Cellular Services, thus permitting the lowest cost installation and highest possible features for any client. VOIP Permit unlimited simultaneous Voice and Video channels via the Webb Vision App.

Software

Browser based software ensures this product does not require any client software to be installed on a PC and can be programmed by any PC, tablet, or phone Android or iOS. Changes to the directory maybe made on-site over a LAN or remote from the Internet. SaaS Cloud services are available to provide automated back-up and monitor the health of your Vision-1700. The issuance of QR codes to allow visitors and contractors temporary access is also seamlessly managed through the software.
