

A “Touchless” Web-Enabled ADD-ON to your existing visitor entry system

Retrofittable design uses personal smart phone to access the building.

VISION-QR

FITS ANY EXISTING Visitor Entry System

Webb Electronics has pioneered a new entry solution that will transform the access-system industry. The Webb Vision-QR is a web-enabled entry access system specifically design for multi-residential buildings and office towers. By keeping your existing entry phone in place, the Vision-QR allows visitors to use their existing trusted smart phone place a call and enter the building. Simply scan the QR code on the front of the entry phone and a directory will appear on your phone so you can contact the resident.

- More hygienic
- Eliminates need to touch a shared screen or keypad
- Easy to use
- Easy and quick to install
- Saves you money on phone lines with the Webb Vision phone service
- Existing entry phone still functions
- No APP to install
- COST EFFECTIVE UPGRADE

Product Highlights
