¹In general, a charitable unitrust (e.g., CRUT, CLUT) may give one more control and flexibility, while an annuity trust (e.g., CRAT, CLAT) may give one more predictability toward a specific desired outcome. However, the factors behind such a decision are complex and may require the assistance of a professional (i.e., an attorney).

²While a PIF does require an annual tax return to be filed, this is generally handled by the charity that is running the PIF.

³The tax deduction amount for a PIF is determined by several factors (e.g., FMV of gift, IRS-determined rate of return, number of income beneficiaries, ages of beneficiaries, etc.).

⁴The taxation of CRT distributions follows a complex hierarchy that first taxes certain types of income before taxing other types of income (e.g., ordinary income, capital gains, tax-free, principal, etc.).

⁵Income from a CGA is derived via annuitization and consists of gains (taxed as ordinary income) and basis (nontaxable). It becomes fully taxable as ordinary income once the basis is recovered.
