

When we send a Keystone and Atlas Copco representative out to [walk your line](#), rest assured knowing that your assembly expert has walked hundreds of assembly lines. They know what to look for and what they are doing.

Your strategic partner

At Keystone Assembly Solutions and Atlas Copco, it's important that our customers and distributors know that we are more than just a tool and assembly solution supplier. We're on your side and on your team. The '[Walk the Line](#)' program is one way we can prove this. As the world continues to transition to the Fourth Industrial Revolution, or Industry 4.0, in which traditional manufacturing practices are becoming more and more reliant on the latest and most intuitive technology, we want to help your facility keep pace. More than that, though, Keystone and Atlas Copco wants to assist your facility in becoming as proficient as it can be in all processes.

The value of ‘Walk the Line’

Keystone and Atlas Copco will assess your systems, focusing on areas that would benefit from optimization or a system upgrade. After the walk-through, your representative will evaluate their results and investigate further to find solutions and opportunities for enhancements.

Following this, your representative will come up with a comprehensive list of recommendations that will translate into a handful of benefits for your facility. Focusing on areas of concern such as [ergonomics](#), facility safety, [software](#), access issues, [error-proofing](#), and much more, our assembly expert has all the tools to set your facility up for complete success. Increased productivity and quality output, reduced downtimes, and a reduction in the assembly process and life-cycle costs are all benefits your facility can expect and count on from Atlas Copco and Keystone

Objectives and recommendations

Depending upon the objectives provided by you, we’ll scale our investigation and subsequent solutions to fit your demands. We can provide complex system investigations for the improvement of an entire facility, or a simple, quick analysis of one single aspect to your facility. It all depends on your needs. Our extensive knowledge in tightening processes and tools, material handling, software, and material removal and service set us apart from competitors.

No other manufacturer can offer extensive knowledge, robust product portfolios, and global resources that we can. Further, we’re here for the long run. We will demonstrate the potential that your production facility has by using the suggested solutions. Our [Service teams and Service Solution Center](#) will be there at installation, ensuring that your new and improved systems are fully operational and ready to go. They are there for maintenance too, meaning that if an issue or concern ever arises, we’ll be at your facility as soon as possible to work things out. To learn more about our ‘Walk the Line’ program or to set up a ‘Walk t-he Line’ - appointment, [contact us](#) today at solutions@keystoneassembly.com or 844-KAS-TOOLS (844.527.8665).
