CAPABILITIES STATEMENT

Maintaining the highest standard of service in the industry is not only considered our professional duty but is the essential lifeblood of our organization. As a firm of design & engineering specialists, we extend beyond the typical service offerings. We deliver exceptional interior design solutions with a focus on FF&E, procurement, creating cohesive and functional spaces tailored to client needs. Our value engineering expertise ensures cost-effective, high-quality results without compromising on aesthetics or performance. With professional consultants, you will receive solutions, not restrictions, to keep your project on track within an increasingly complex built environment of technological advancements and regulations.

With over 200 million square feet of successful design and assessment experience, we maintain an intimate knowledge of the federal, state, and local jurisdictions' codes, standards, and best practices. This includes decades of experience in design and consulting on interiors FF&E, physical/technical security, and fire protection systems. When not addressed by the typical one-size-fits-all prescriptive code-based methodology, we provide a performance-based solution to tackle your most difficult problems.
