

Over the last 11 years C&C Cattle Company has built a herd of Registered Texas Longhorn cattle with some of the best genetics this great industry has had to offer. We are pleased with the results of adding genetics from hundreds of breeding herds around the United States. With the tool of AI (Artificial Insemination), our herd has taken leaps and bounds that we are so very proud of.

Today, this newsletter is to create a background or rather I say a "backbone" of our core brood cow herd today. Listed below in no specific order are some of our best Texas Longhorn brood cows that we have ever had. We hope you enjoy this newsletter and get to know our herd a little better!

Dragon Talon, bred by Joel Dickinson and newly owned by the Graff/Courtney Partnership, with Joe & Eileen Graff of Emerald Isle Longhorns in Vernon, NY. Dragon Talon is a rare black and white daughter of Drag Iron out Noble Wine, by Noble Knight.

Noble Knight was sired by the great Over Kill and out of a daughter of Unlimited, the great Butler sire. Over Kill, was sired by Over Head who was the first black and white sire to go over the 80" mark for the TL breed. Over Head was out of the great twist horn cow Overlyn who many of the twisty corkscrew horned cattle that you see today, get their beautiful twist from. Over Kill's dam, Field of Pearls was one of the best producing cows in our industry for many years. Add a little Jamakizm from Tom Smith's breeding and mix it all together and you get big, beautiful, attractive cows like Dragon Talon. The Graff/Courtney Partnership has big plans for this great cow. Stay tuned!

BG Hot Sauce- this double bred Drag Iron daughter is truly one of our best producing cows on the ranch today. Every year she out-produces herself no matter the bull you cross her with. She was bred and raised by Andy & Amber Dunmire of Bonnie Glen Farms in Coshocton County, Ohio. She was purchased by C&C Cattle Co., in Summer of 2021 and we are just so pleased with the wonderful producing cow she has become. Her pedigree consists of some really great producing cattle like, Annex, Drag Iron, Jester, Juma, Super Bowl, 3x's to Winchester, 3x's to Jamakizm and the great early

horn growth bull Senator. With this pedigree, she is bound to produce some greats like Casanova Mac (by CV Cowboy Casanova), and Cat Daddy (by Iron Span) who are both being used as Herd Sires today. Hot Sauce is a ranch favorite and her gentle and sweet disposition makes her one of the best!

Stop The Queen- WOW! What a cow! She is everything a Texas Longhorn cow should look like. Tons of color, productive, good milker, flat lateral horn with some twist, easy disposition, and large body with frame. On the ranch we have 3 generations of this cow and we have kept a heifer from each one. Stop The Queen is one of the best mothers on the ranch, always raising one of the fattest calves every year and never skips a beat to breed right back and do it all over again. She is in her 8th year in 2025 and is showing every sign of continuing to do us a great job. Stop The Queen is sired by Non Stop, a son of Over Kill out of one of the most twisty horned daughters of Top Caliber ever raised at Dickinson Cattle Co., Obvious Top. Obvious Top is also the dam to Iron

Span, who is by Drag Iron. Iron Span is one of the best sons produced from that cow making this family one of the most consistent in many herds around. Stop The Queen's dam, River Queen is sired by the great Tempter, who was a son of the famous Field of Pearls cow that DCCI did wonderfully with, out of a daughter of Mile Marker. She combines 2 of the most popular and productive female lines ever to come off the Dickinson Ranch, Obvious Top and Field of Pearls. Put it all together and the results are superb, just like our great cow Stop The Queen.

September Pearls, a daughter of Pearl Snap BCB, who is known for siring Futurity winners for the Lonesome Pines Ranch in Texas, out of a daughter of Black Kettle who did very well for the Randolph's and Ohlendorf's. This bright colored, dunn brindle cow is a show stopper. Her quiet disposition makes her a ranch and spectator favorite when you pull in the pasture. September Pearls has one of the largest frames of any cow on the ranch and just look at the twist on those horns. She certainly stands out in the pasture. September Pearls is owned by the Graff/Courtney Partnership with Joe & Eileen Graff of Emerald Isle Longhorns in Vernon, NY. The partnership retained a heifer

calf from her born Aug. 2024 bred by Harrison lager to someday be her replacement. The consistency of this cow's progeny will knock your socks off! Breed her to any bull and she is going to give you a result you will love. We are excited to have acquired this awesome cow and we have big plans for her in the future! Stay tuned!!

RS Lucky Lady- a daughter of Tejas Tactical out of a granddaughter of Working Man Chex who was used by the Bolen's and did very well with. This 5 year old cow is a wonderful producer and has been for us for 2 years now. Producer nothing but heifers her whole motherhood career, she really knows how to put a replacement heifer together. Her almost 80" lateral horn spread makes her a stand out cow in our pastures, and let's not forget that speckled and spotted red and white hide pattern that makes her pop! She is an excellent mother and milker and we are very excited to have her in our core breeding herd today. The plans we have for this cow are just as exciting as her and her progeny and we expect to keep getting great results from her each year she calves.

The core breeding herd of C&C Cattle Co. consists of about 20 breeding age females at all times. The 5 females listed above are just some of the best out of our main herd. We

thought we would take the time and thank and showcase them a little bit for other breeders to admire and enjoy. As always thank you for taking the time to read our newsletter this time, we hope you have enjoyed our great cows as much as we do. C&C Cattle Company offers breeding stock for sale at all times, and we encourage you to visit our website at www.nytexaslonghorns.com to view a complete inventory list of what is for sale! We offer excellent cattle at reasonable prices to help anyone who loves and enjoys this wonderful and historic breed!!

Thanks and God Bless,

Colton R. Courtney
