Each coordinator may have an associate coordinator for each group of applicants, groups could be 100 to 500 applicants, your assessment. Keep a list of your associates and a copy of what they have. Express faith and hope in America. Any misconduct while gathering names for signup will void the application and ban the city from further applications.

# Possible Site Locations

Name of City for This Application

State:

Country:

(Please Print)

**Note:**

Please provide three possible locations for the power plant. The site should be approximately seven acres, though it could be slightly more or less. The map should fit on an 8.5" x 11" sheet of paper. The street map should be in black and white, to scale, and include a scale bar and a north arrow. Outline the perimeter of the site with a heavy red line. The outline may be sketched by hand. You can obtain a parcel ID number online from AcreValue.com, along with the acreage. Ensure that it is not in a flood zone, but we can verify that as well.

If you have a survey from a licensed landscape surveyor, send the digital image to miller@millerenergy.me. Place the location sheets in the application. These locations are only suggestions and will be considered along with other sites. Do not staple please.
