EYEBROW LAMINATION & TINT AFTER CARE

Stylist Availability

MONDAY TUESDAY WEDNESDAY THURSDAY FRIDAY SATURDAY SUNDAY

THE FIRST 24 HOURS

A typical Eyebrow lamination application life span is 4-6 weeks

By following these guidelines you will have better retention which means longer lasting brow lamination

- Do **NOT** get your Brows wet within the first 24hrs
- Do **NOT** use waterproof cosmetics on your Brows
- Do **NOT** rub excessively on eyebrows
- Do **NOT** expose new brows to heat or steam

What is a Brow Lamination?

A eyebrow lamination is a semi-permanent reshaping of the brow hairs to change the natural angle and curl pattern of the brows. It is achieved by brushing the brows into a desired position and applying a perm solution formulated for brows.

What is the perm made of?

The perm is made up of a Thioglycolic Acid, along with other ingredients, and is used with a setting lotion and has keratin nourisher incorporated for the brow hairs.

Your First Wash

Wash your face as normal avoid getting soap onto the brows. Rinse face, take one pump of our specially formulated lash foaming cleanser, apply to the brows in the same direction that the hairs are going. If possible, use a soft bristle lash brush to comb through the brows.
