

VISUAL BEAUTÉ STUDIOS
LASH EXTENSIONS

AFTER THE FIRST 24 HOURS

Always Avoid!

- Oil based eye products
- Waterproof eye makeup
- Excessive high heat flashes
- Excessive steam
- Extreme moisture
- Rubbing or picking lashes

Cleansing Lashes

The cleaner we keep our extensions, the longer they will last and our natural lashes will remain in better health

Morning Routine

Use our visual Beauté Studio foaming cleanser to wash lashes towel dry/blot, let air dry, then brush out using a soft bristle lash wand use water base mascara if needed

Throughout the day

Throughout the day brush your lashes and care for them based upon daily activity for instance rinse lashes with water immediately after visiting a beach, lake, pool etc to avoid damage and premature fallout.

Nighttime Routine

Use a makeup remover that is not oil-based to remove makeup from around the eyes cleanse your lashes with the VBS foaming cleanser apply lash serum (if applicable)

How To Avoid Infections

Guests that have residue from their mascara, eyeliner, etc. will experience lower retention any residue is foreign to the eye area and will form bacteria when not properly removed on a daily basis. Lingering makeup can also flake off into the eye causing scratches washing daily can help avoid buildup residue
