

VISUAL BEAUTÉ STUDIOS  
A FULL SERVICE SALON

# AFTER THE

# FIRST 24 HOURS

## Always Avoid!

- Oil based eye products
- Excessive steam
- Waterproof eye makeup
- Extreme moisture
- Excessive high heat flashes
- Rubbing or picking lashes

### Cleansing Lashes

The cleaner we keep our extensions, the longer they will last and our natural lashes will remain in better health

### Morning Routine

Use our visual Beauté Studio foaming cleanser to wash lashes towel dry/blot, let air dry, then brush out using a soft bristle lash wand

### Throughout the day

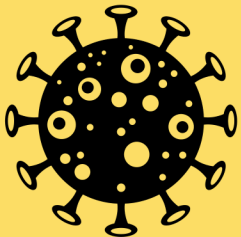

Throughout the day brush your lashes and care for them based upon daily activity for instance rinse lashes with water immediately after visiting a beach, lake, pool etc to avoid premature fallout caused by salt breaking down the adhesive's bond.

### Nighttime Routine

Use a makeup remover that is not oil-based to remove makeup from around the eyes cleanse your lashes with the VBS foaming cleanser apply lash serum (if applicable)

### How To Avoid Infections

Extensions that are being applied to a natural lash that has makeup residue on it is being applied to that makeup residue, not the natural lash. Guests that have residue from their mascara, eyeliner, etc. will experience lower retention any residue is foreign to the eye area and will form bacteria when not properly removed on a daily basis. Lingering makeup can also flake off into the eye causing scratches washing twice daily can help avoid buildup residue
