Agriculture Risk Coverage and Price Loss Coverage Programs Receive 2018 Farm Bill One Year Extension, Farmers Can Now Enroll for the 2024 Crop Year

The U.S. Department of Agriculture (USDA) today announced that agricultural producers can now enroll in the Farm Service Agency's (FSA) Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2024 crop year. Producers can enroll and make election changes for the 2024 crop year starting Dec. 18, 2023. The deadline to complete enrollment and any election change is March 15, 2024.

On Nov. 16, 2023, President Biden signed into law H.R. 6363, the Further Continuing Appropriations and Other Extensions Act, 2024 (Pub. L. 118-22), which extended the Agriculture Improvement Act of 2018 (Pub. L. 115-334), more commonly known as the 2018 Farm Bill, through September 30, 2024. This extension allows authorized programs, including ARC and PLC, to continue operating.

"Having the Farm Bill extension in place means business as usual for Agriculture Risk Coverage and Price Loss Coverage program implementation for the 2024 crop year — nothing has changed from previous years," said FSA Administrator Zach Ducheneaux. "These programs provide critical financial protections against commodity market volatilities for many American farmers so don't delay enrollment. Avoid the rush and contact your local FSA office for an appointment because even if you are not changing your program election for 2024, you still need to sign a contract to enroll."

ARC and PLC are part of a broader USDA safety net that also includes crop insurance and marketing assistance loans. Producers are reminded that ARC and PLC elections and enrollments can impact eligibility for some crop insurance products. Producers on farms with a PLC election can purchase Supplemental Coverage Option (SCO) through their Approved Insurance Provider; however, producers on farms where ARC is the election are ineligible for SCO on their planted acres for that crop on that farm. Unlike SCO, the Enhanced Coverage Option (ECO) is unaffected by an ARC election. Producers may add ECO regardless of the farm program election. Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres for that farm.

For more information on ARC and PLC, producers can visit the [ARC and PLC webpage](#) or contact their local [USDA Service Center](#). Producers can also make elections and complete enrollment [online with level 2 eAuth](#).
