TOTAL FINISHING

Call Us At: (844) 898-1082

Features:

- Non-contact coating thickness measurement for paint and powder coatings, with results in as little as 20 milliseconds
- Measures wet, dry, and cured coatings on metal substrates to reduce material waste and prevent coating defects
- Measures moving or vibrating parts and works on all coating colors, including white
- Lightweight, portable design with real-time data access

Specifications:

- Wet / Uncured Coating Range: 10–300 µm
- Dried / Cured Coating Range: 10–500 µm
- Smallest Measurement Spot: 2 mm
- Relative Standard Deviation: Less than 2%
