

# HomeVault Title Monitoring

## How the Scam Works...

Internet thieves find homes with equity. Then they file a fraudulent deed making it look like you sold your home to them. You will receive NO notice that this is occurring. They take a mortgage out on your home through an online bank and pocket the money. You won't find out until the bank forecloses on your home. By then, it may be too late.

## **How does HomeVault Title Monitoring prevent this?**

The HomeVault Title Monitoring conducts a limited title search on your home once EVERY month (more often than our competitors). If a thief has fraudulently deeded your home, you will be notified and you will have time to fix the deed BEFORE any foreclosure action is filed against your home.

## **What if somebody tries to steal my home?**

We will notify you if somebody files a deed or mortgage with your name on it. If we notify you of a fraudulent activity, then we have a resolution team at the firm ready to kick into action to fix your problem.

**This program is backed by a  
money back guarantee.**
