

AMWC 2025 Award for Best Non-Invasive Device

360° Radical Muscle Activation. Full Body. One Session.

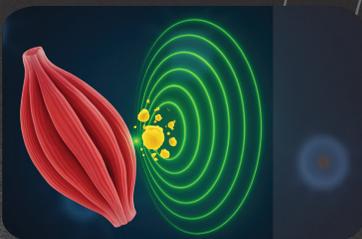

Wonder Axon is a complete full-body Neuromuscular system, internationally awarded, designed to simultaneously activate up to six major muscle groups. Its deep, high-intensity stimulation produces immediate visible improvements while promoting coordinated, balanced, and global muscle development throughout the entire body.

Triple Action. Triple Efficacy.

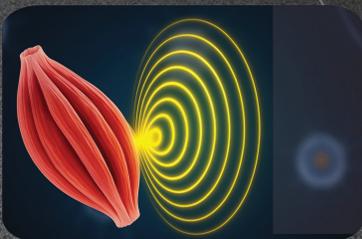

Neurostimulation

It outperforms traditional exercise by simultaneously activating slow-twitch (Type I) and fast-twitch (Type II) muscle fibers. Bioelectrical signaling stimulates deep motor units, optimizing strength, endurance, and metabolism.

Radiofrequency

It provides deep thermal stimulation to increase perfusion and activate collagen remodeling. It optimizes tissue metabolism and refines skin architecture, achieving a sculpted and rejuvenated appearance.

Magnetic stimulation

It emits controlled electromagnetic fields to amplify Neuromuscular activation and improve circulation. This targeted energy accelerates metabolic activity, promoting greater muscle density and tissue revitalization.

BENEFITS FOR THE PATIENT AND THE CLINIC

➤ 60,000 Muscle Contractions

➤ Record Depth: 20 cm penetration

➤ 6 Muscle Groups at the Same Time

Wonder Axon[®] Aesthetic Body Toning: Fat Reduction & Muscle Enhancement

Wonder Axon combines high-power neuromuscular, radiofrequency and pulsed magnetic stimulation to trigger deep muscle activation, boost fat-metabolic activity, and deliver noticeable improvements in body tone. Treatments are completely painless, offering a stimulating yet comfortable experience that enhances circulation, skin texture, firmness, and contour definition. Each session is short, precisely controlled, and required only once or twice per week.

Waist Reduction

Gluteal Volume Increase
