

HERINGER ESTATES

FAMILY VINEYARDS & WINERY

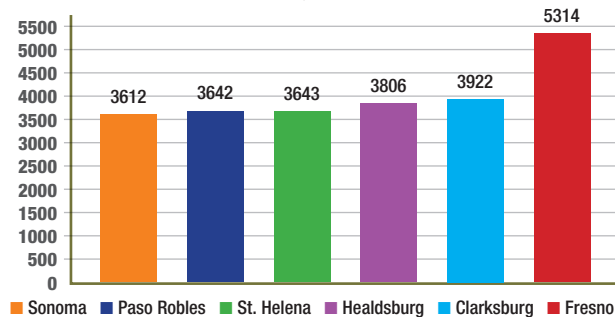

CLARKSBURG, CALIFORNIA

Located in the heart of the Sacramento River Delta in Northern California, Clarksburg has a rich growing climate for a wide variety of wine grapes.

Limited summer fog enables Clarksburg to consistently grow a more diverse portfolio of premium wine grapes.

Average Annual Growing Degree Days

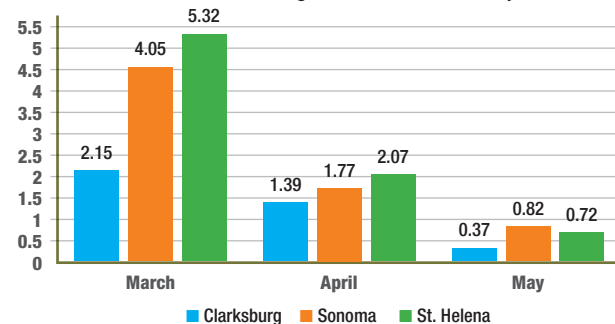

*Data sourced from Western Regional Climate Center at 50°F base

Less spring rainfall, depleting ground water faster, stressing the vines sooner, and creating a more flavorful wine grape.

Spring Monthly Average Rainfall

*Data sourced from Western Regional Climate Center 30+ year data

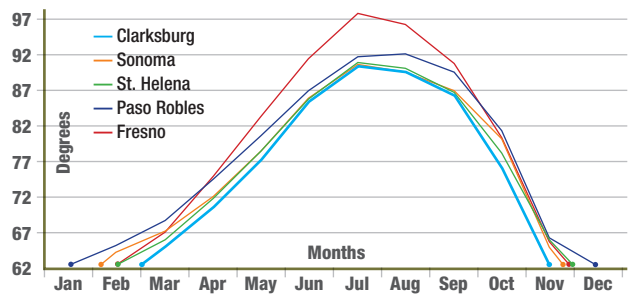

HeringerEstates.com (916) 744-1094
grapes@heringerestates.com

Ideal micro-climate.

Monthly Maximum Temp Climate Summaries

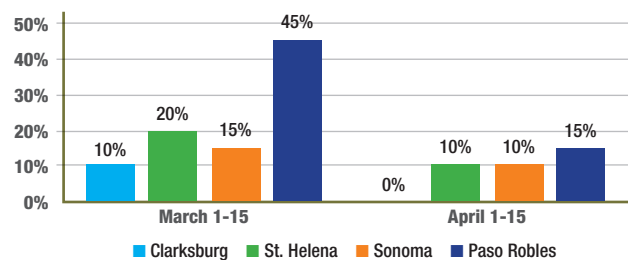

*Data sourced from Western Regional Climate Center on 29 year average

Low probability for spring frost.

Spring Freeze Probabilities at 28.5°F

*Data sourced from Western Regional Climate Center on 30+ year data

Less fall rainfall during critical wine grape growing stages.

Fall Monthly Average Rainfall
