

HIGH TEMPERATURE FURNACE FANS

NEW & REBUILT AIR/WATER COOLED FANS AND FAN CARTRIDGES FOR HIGH TEMPERATURE FURNACES

WIRCO's refurbishing service allows for the replacement of either shaft or hub while salvaging reusable parts. This can be a tremendous savings when replacement of furnace fans is necessary. We have complete facilities and materials on hand to rebuild and repair your fan bungs. We provide a major savings by salvaging any of your usable components and rebuilding them to original condition. Send in your old bung to receive an evaluation and quotation.
