

Dei Alma Creatore

The diagram shows us where the northern aspects are within our relationships to all things in our known universe. The celestial equator is the band on which the astrological nature of the universe interacts with the directional universe. As such the 8 shown portions of this array with the zenith, and the meridian points explain in our work where the planets and thus the gates of the sources fall within our understanding. They also follow rotational balances with our collective of understanding. In working with this system the balance and position of potential point associations move as the need arises to have them be in different places. Where the gate of the North is not a static place to put say “Life” or “Death” or “chaos” or “Time”. It becomes balanced by where the need is. As such the uses of understanding the universe in this method are as follows:

Energy unions must be in perfect balance with the elements, directional gates, and the 8 sources, and planetary gates as well.

Modification of the regional effect or the moment/person in the time space by condensing the flow of the source currents and the temporal field about the planar directions. When you can

achieve this 3 dimensional model of energy. Then you can hold the energy still, and modify the zone of effect.

With this, you can implant full suggestion as to what will occur within the central target. You can then in a controlled way create a world within the space, or modify an existing one if you can set yourself outside the space to be modified.

To move, slow, or change the developmental energies, and threads within the space you would need to pull on the cause and effect/time displacement/events and momentum of everything in that region to hold it, and adjust it accordingly.

Power is what moves this spell, if you lack the aforementioned ability to balance all the 8 sources, gates of the elements, planetary zones and zodiac, this particular spell will not function.

The energy in the image is static. However to get the flow of the currents properly there must be the horizontal energy of 8, the directional gates, the angular of the meridian currents that spin with the 8 x 12 zodiac gates. The 8 source gates which open the way for the universal sphere.

When this sphere occurs anything within its effect radius will be components in a modification that can make/remake the situation before it occurs.

This shows the full extent of how to access the universal energy outside of the limitations of the source currents, the directional mechanics, the angles of the 12 gates, the planetary gates of the stellar bodies. When motion is applied to the stagnated form, then the energy flows, and the universal current becomes the catalyst of conjurations/manifestation. This is by no means a complete list. However it is the root of universal sorcery in this collection of thoughts and projects. As it is the most complete attempt at showing the raw forms that this work aims to cover through the following pages.
