FOR IMMEDIATE RELEASE

From our President & Person Responsible for Maintenance (PRM)

To Our Loyal Customers,

Servicing, repairing, overhauling, and rebuilding of aircraft and aeronautical parts is our passion.

We take pride in delivering the best customer service, quality, value, and aeronautical safety.

As such we have made strategic investments over the last three years to ensure that we are not only meeting but exceeding industry standards on safety.

This has, and forever will be our policy and philosophy, safety over all else. Our Team strives to deliver the best possible product at the best value to our customers.

With the Bank of Canada seeing an over 15% inflation rate since we began offering direct to consumer services, we are faced with the difficult choice of a shop hourly labour rate increase from CAD \$90 to CAD \$105 and a new Component Overhaul shop rate of CAD \$125.

This decision, although difficult, is crucial to our ability to provide our customers with the best possible service while continuing to uphold CAMX Aerospace's impeccable safety record.

These new rates will come into effect on the 1st of December 2023, all existing work orders, quotes and ongoing LTP (Long Term Projects) will be honored at the old labor rate.

We thank you for your continued support and look forward to seeing you at one of our three locations, or at your hangar soon.

If you have any concerns or questions, please contact me directly.

Kyle Marcoux
President and PRM
