

Q & A (Cont.)

How Long Has HDDR Been in Business?

Since, December 15, 2013.

Do You Provide Estimates?

Since we typically do lists of small jobs, it is not possible to determine our labor cost per item and offer estimates. Therefore, we charge by the hour and fractions thereof.

What Areas Do You Serve?

Being located at McBee Station, our emphasis is to serve the downtown area and it's communities. However, we frequently answer calls to areas up to a 30-mile radius from Greenville.

How Do You Accept Payment?

We can only receive payment using the Square App and therefore can only accept credit or debit cards. Payment must be received the SAME DAY of service. Thank you for your understanding.

YOUR HANDYMAN

in *DOWNTOWN*

Greenville

“We fit the niche of jobs between what homeowners and larger contractors don't want to do.”

Mark Weir
Owner
Honey Dos Done Right

Q & A

What Does Honey Dos Done Right Do?

Honey Dos Done Right is your specialist for INDOOR small-project handyman jobs including plumbing and electrical work. We typically do lists of items where each task can be completed within an hour or less. A few examples would be **mounting a TV; hanging a dry erase board; hanging curtains; changing a light fixture or replacing a faucet.** *No job is too small.*

How Much Do You Charge?

Our basic handyman service rate is \$100/hr. Electrical and plumbing are \$150/hr. The customer receives the best value by providing a list of diverse jobs that would normally require them to schedule a few different companies.

Are You Licensed and Insured?

Honey Dos Done Right carries a \$1,000,000 liability policy and the contractor bond required by the state of South Carolina for businesses in this industry. South Carolina does not offer a handyman license, since the services offered are in too broad of a category to be considered a specialty.

About the Owner

Mark Weir was raised in the suburbs of Atlanta, GA and has resided with his family in Greenville since 2006. He started Honey Dos Done Right on December 15, 2013, to meet the need for more responsible handyman services in the growing Greenville area. He has always had an interest in home improvement as well as other fields of repair and maintenance. Although holding several office jobs in the past such as salesman, marketing manager and IT manager, he has periodically been drawn back to mechanical labor of some kind. From building maintenance mechanic to FAA licensed aircraft mechanic, repair and maintenance has been a consistent interest.
