

Good Health Starts in the Gut

A healthy gut helps with:¹

- Immune defense
- Metabolism
- Modification of phytochemicals
- Supporting elimination
- Vitamin biosynthesis
- Influencing whole body health

External factors capable of adversely modifying the gut and interfering with ideal function include:²⁻⁹

- Antibiotic use
- Prolonged prescription drug use
- Dietary changes
- Gastrointestinal stress
- Moving to a new country
- Short-term travel
- Environmental toxins

Changing Lives with Nutrition
