ABOUT US

Grey Matter Robotics Pvt. Ltd. is a leading industrial automation company based in Gujarat, India, with over 8 years of expertise in developing advanced **pick-and-place** and **machine tending solutions**. We specialize in manufacturing robust **4-axis gantry systems** and **integrating 6-axis robotic arms** for turnkey projects, serving clients globally.

Our state-of-the-art 20,000 sq. ft. manufacturing facility enables us to deliver high-quality automation solutions, having successfully automated over **300+ machines** and **150+ projects worldwide**.

SOLUTIONS WE PROVIDE

Pick & Place

Conveyor System
Automation

Custom Automation
applications

Robotics Machine
Tending

Gantry System
Automation

Auto Gauging /
Inspection System

INDUSTRIES WE SERVE

Pharmaceutical Industry

Auto Parts Manufacturers

Logistics & Packaging

Food Industry

Solar Manufacturers

Brass Components

Pump & Motors Industry

TURNKEY AUTOMATION SOLUTION

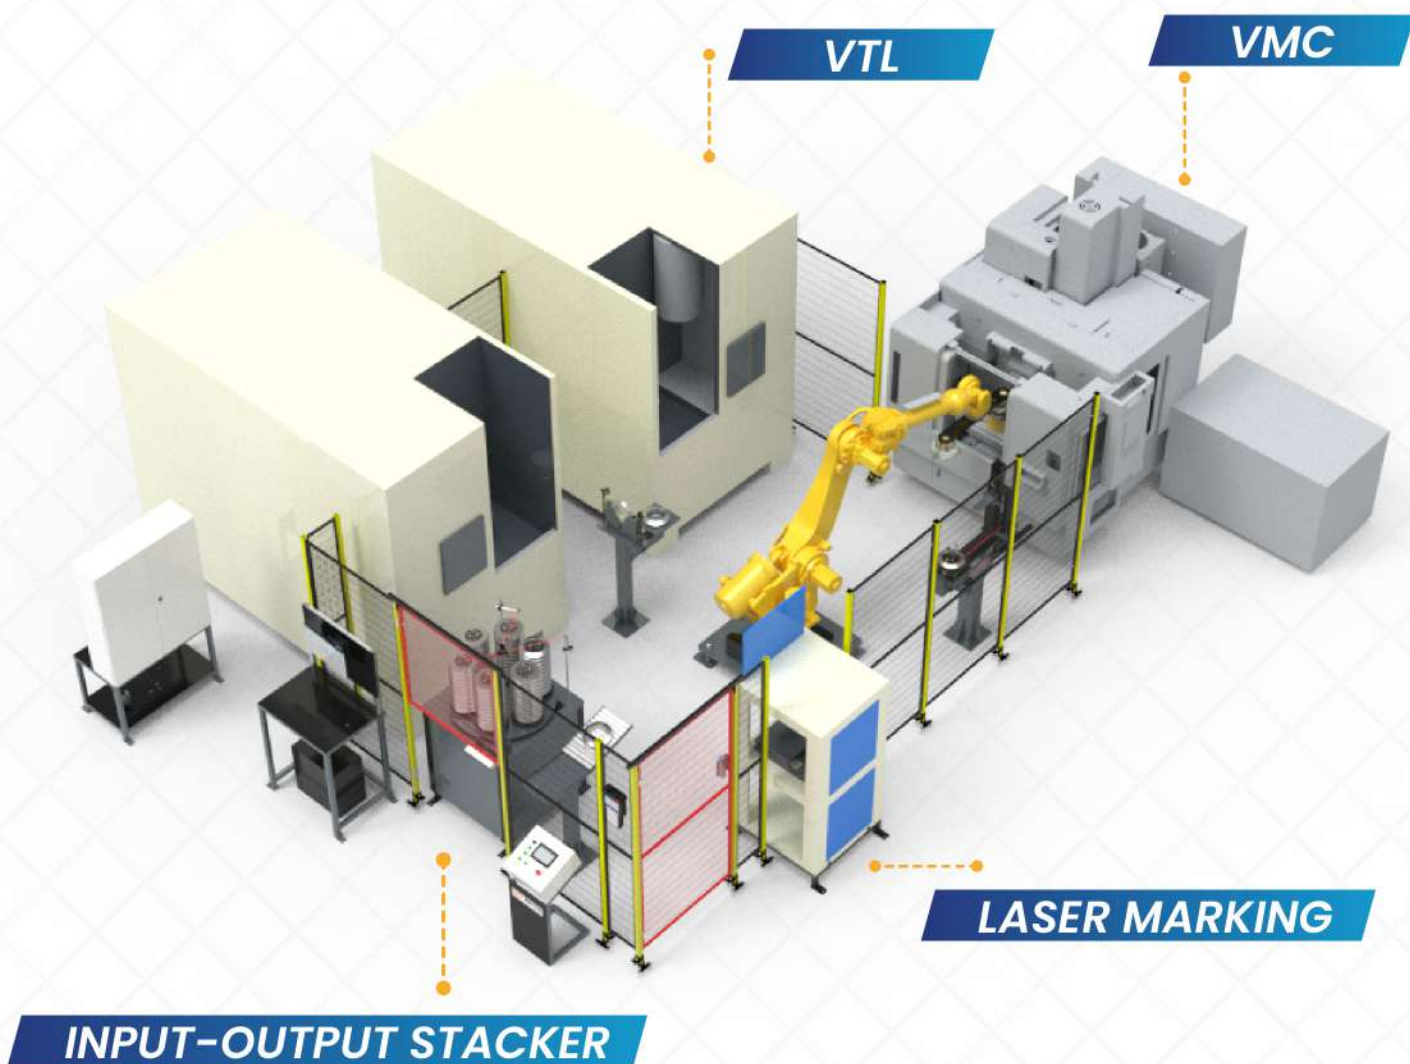

4-AXIS GANTRY

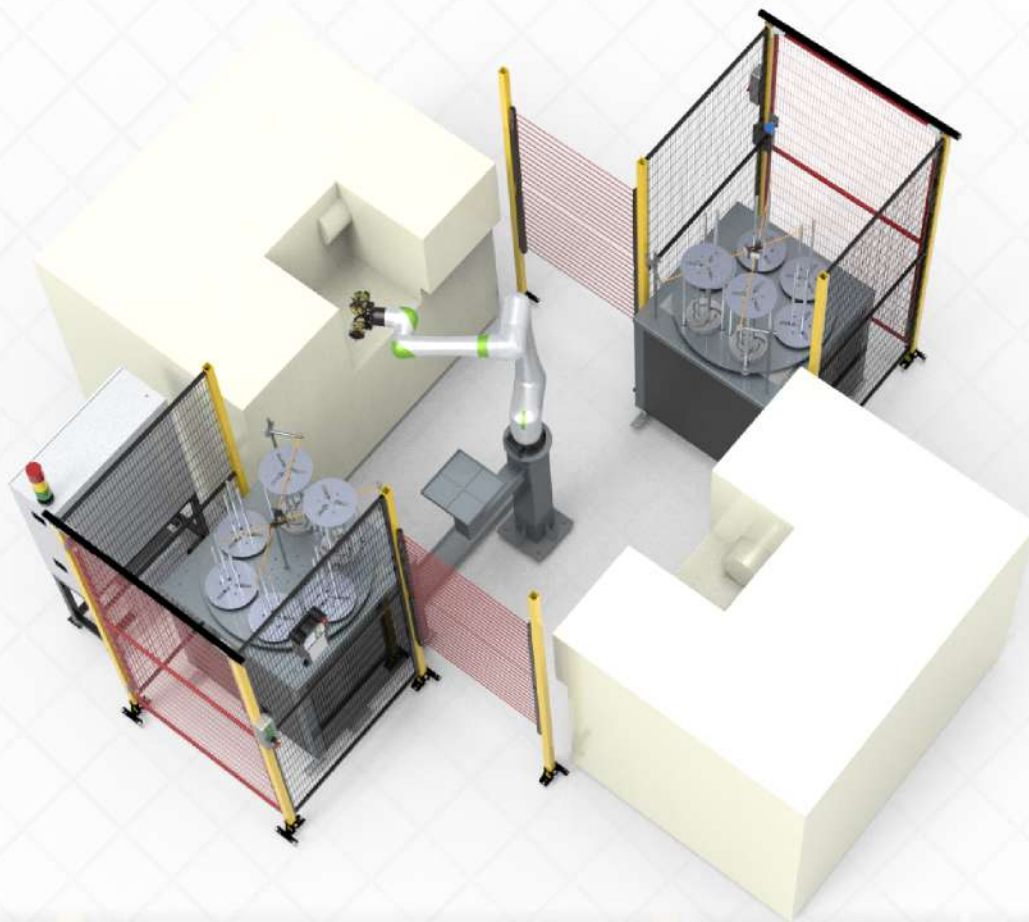

- ⚙ Higher Payload Capacity
- ⚙ User Friendly Operation
- ⚙ Spares Available Easily
- ⚙ No Extra Floor Space Required

TURNKEY ROBOTIC ARM PROJECT

COBOT CELL

MULTI DIMENSIONAL AUTO GAUGING

⚙️ Human error elimination

⚙️ Data-Driven Precision:
Utilizing SPC algorithms for
accurate wear offset calculations.

⚙️ Zero component rejection

⚙️ Data Storage:
USB-enabled for storing and
retrieving correction values.

GREY MATTER

AUTOMATION PERIPHERALS

SERVO STACKER SYSTEM

Automatic servo Stacking system for Gantry / robots / automation input feeding applicable to components manufacturers / CNC machining

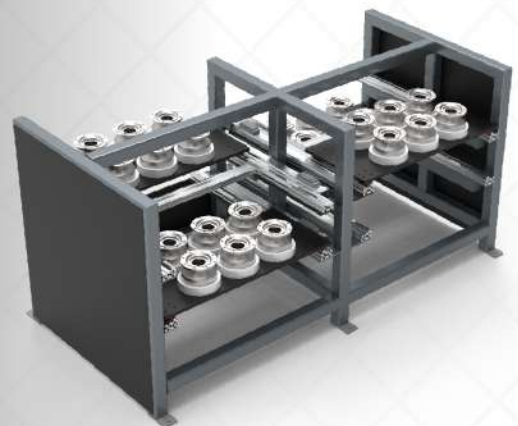

CONVEYOR SYSTEM

conveyor system for input – output of Gantry / robots automation system . We manufacture customized conveyor for varying automation applications.

AUTOMATIC INPUT PALLET STACKER

Pallet stacker for robotic cell input feeding automation – used for auto components manufacturers and other component manufacturers .

ROBOT TRACK/ 7TH AXIS

Grey Matter Robotics manufactures and supplies 7th axis robot tracks, enhancing industrial robot mobility. These tracks allow robotic arms to extend reach and access wider workspaces.
