Who We Are

Our expertise spans logistical coordination and facilitation of event and program design for in-person, online, blended learning, and virtual events using a multitude of technologies. The planning process is fully virtual, allowing us to support you no matter where you're located. You can choose to have us onsite for the event or manage the execution independently.

You will be working directly with Julianne Jones who has been organizing events for over a decade. While the industries she's worked in have varied, the core skill of "herding cats" remains universally relevant—and one she has mastered across every setting.

Why Choose Metis
