Mixed material graphics are also a unique way to decorate your areas.

Texwalk is the ultimate, one-step graphics solution for indoor floors and walls. Texwalk works great on carpet, tile, wood, metal and painted surfaces. This material is ideal for wall graphics, painted cinder block and locker room graphics.

Long Term Vinyl is a high quality 2 mil vinyl that is water resistant and has an expected performance life of 7 years. Long Term Vinyl works great for wall murals, door wraps, vehicle and trailer wraps, watercraft graphics as well as long-term indoor and outdoor signage.

PVC material helps you project a high-quality, professional image anywhere you can imagine. This medium-weight, durable PVC can be easily installed and is great for indoor and outdoor use. Its matte finish reduces glare, hides fingerprints and can be cut easily into shapes for your custom applications. This works great as directional and informational signs, record boards, locker rooms and gymnasium graphics.
