

# RF Digital Return SFP Series

Axiom Connectivity Digital Return SFPs are designed for superior flexibility and adaptability. By integrating numerous technical innovations, this Digital Return SFP Series ensures prolonged support for evolving network architectures.

## Features:

- Variety of MSA compliant SFPs to simplify logistics of network requirements
- Module designed, programmed and tested with guaranteed compatibility to work with your platform - Cisco, Arris, Aurora or other specified brands
- Highly flexible, easily configurable support for transmissions in 1Gbps, 2.5Gbps & 4.25Gbps in CWDM and 1Gbps, 2.5Gbps, 4.25Gbps & 5Gbps in DWDM for up to 120km reach at 2.5Gbps
- Transceiver options available at 1310nm, 1550nm for up to 40km reach
- For fiber savings, CWDM and DWDM SFPs are available in multiple wavelengths that can be aggregated
- Transceiver and transmitter only options are available
- Regulatory compliance: SFP/SFP+ MSA , RoHS, IEC-61000-4-2 ESD Class 1, FCC Part 15 Class B
- Ultra Temperature rating for operating temps up to +92°C
