

# Custody Transfer Measurement. Executed Without Error.

LACT Skid Fabrication | Meter Proving & Calibration | Loading Arm Construction & Service | Preventative Maintenance Programs

## General Service Overview

Praxis Custody Measurement Group delivers fabrication, construction, calibration, proving, & preventative maintenance services for custody-transfer measurement assets across upstream, midstream, & terminal environments, engineered for accuracy, regulatory compliance, & defensibility in commercial settlement & audit scenarios

- Designed & built for audit-ready custody-transfer accuracy & compliance

## LACT Skid Fabrication

- API MPMS compliant designs
- New Fabrication & Refurbished
- Custody-grade meter runs
- Integrated sampling systems
- Automation-ready controls

## Meter Proving & Calibration

- NIST-traceable volume standards
- API MPMS Ch. 4 proving
- Master meter & SVP services
- ISO 17025 lab verification
- Documented uncertainty analysis

## Loading Arm Construction & Service

- Marine, rail, truck racks
- API RP 1004 alignment
- Mechanical & swivel rebuilds
- Flow-rate & stress verification
- Commissioning & acceptance testing

## Preventative Maintenance Programs

- Scheduled proving intervals
- Drift detection & correction
- Regulatory inspection support
- Emergency response capability
- Lifecycle asset management

## Additional Benefits of Praxis

- ISO-aligned quality procedures
- 24-hour service response
- Field-experienced measurement technicians
- Fully documented proving reports
