

The background is a gradient of dark blue and purple, transitioning from a lighter purple at the top to a darker blue at the bottom. It is decorated with faint, white, circular patterns that resemble orbits or celestial paths. Some of these circles have small arrows indicating a direction of movement. There are also small, white, star-like specks scattered across the background, giving it a cosmic or space-themed appearance. The overall aesthetic is clean and modern, with a focus on geometric and celestial motifs.

EXTINCTION DUE TO HUMAN ACTIONS AND DEFORESTATION

BY HARRY, THOMAS AND CARTER H

WHAT IS EXTINCTION AND DEFORESTATION

- Deforestation is the permanent removal or destruction of forests to use the land for other purposes.
- Extinction is the complete disappearance of a living species from Earth. Extinction means the last member of a plant or animal species dies, meaning that type of living thing is gone forever from Earth.

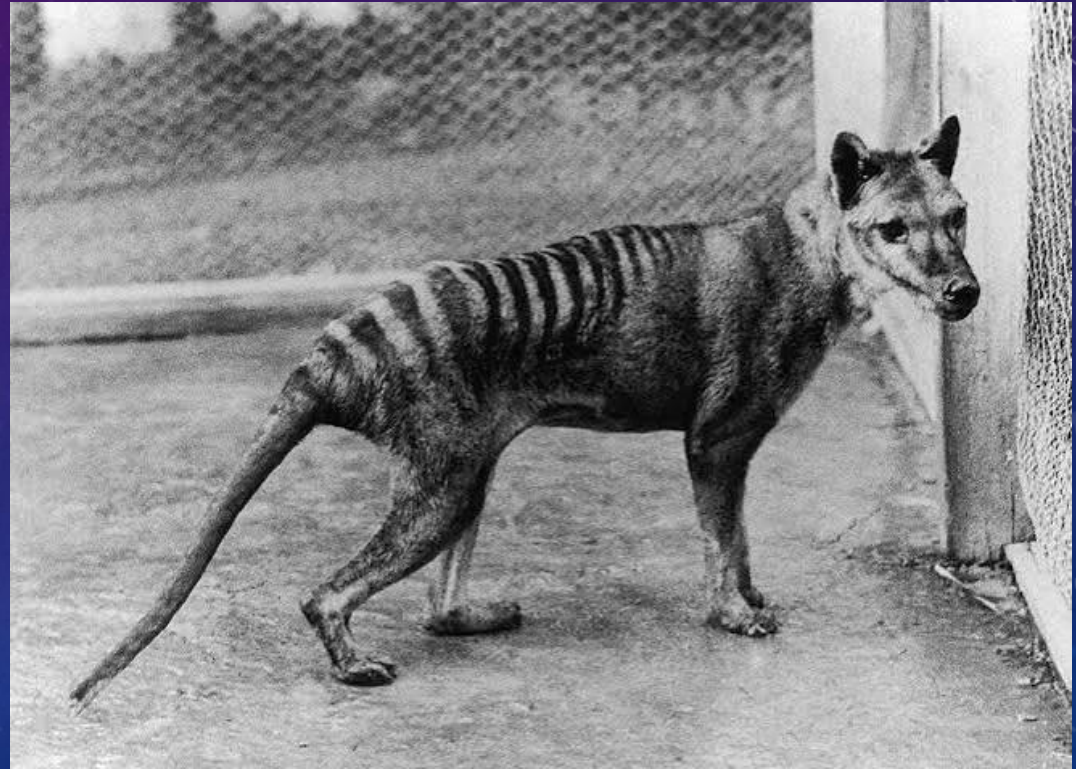

PASSENGER PIGEON.

- The Passenger Pigeon was an iconic bird that once numbered in the billions in North America. It was driven to extinction by human activity in the early 20th century. It was hunted because their flocks were so big it would take an hour to pass by.

TASMANIAN TIGER

The Tasmanian tiger was an extinct meat-eating animal that looked like a dog with stripes. It grew up to about 130 cm long and weighed around 15 to 30 kg.

THE GASTRIC BROODING FROG.

- The Gastric-brooding frog is an extinct group of Australian frogs famous for a unique method where the mother uses her throat as a womb.

DODO

- The Dodo bird became extinct because of human activity. Hunting, and invasive animals destroyed its isolated island ecosystem within roughly a century of its discovery.

BARBARY LION

The Barbary lion is an extinct population of the lion that once roamed the mountains and forests of North Africa.

TIGER

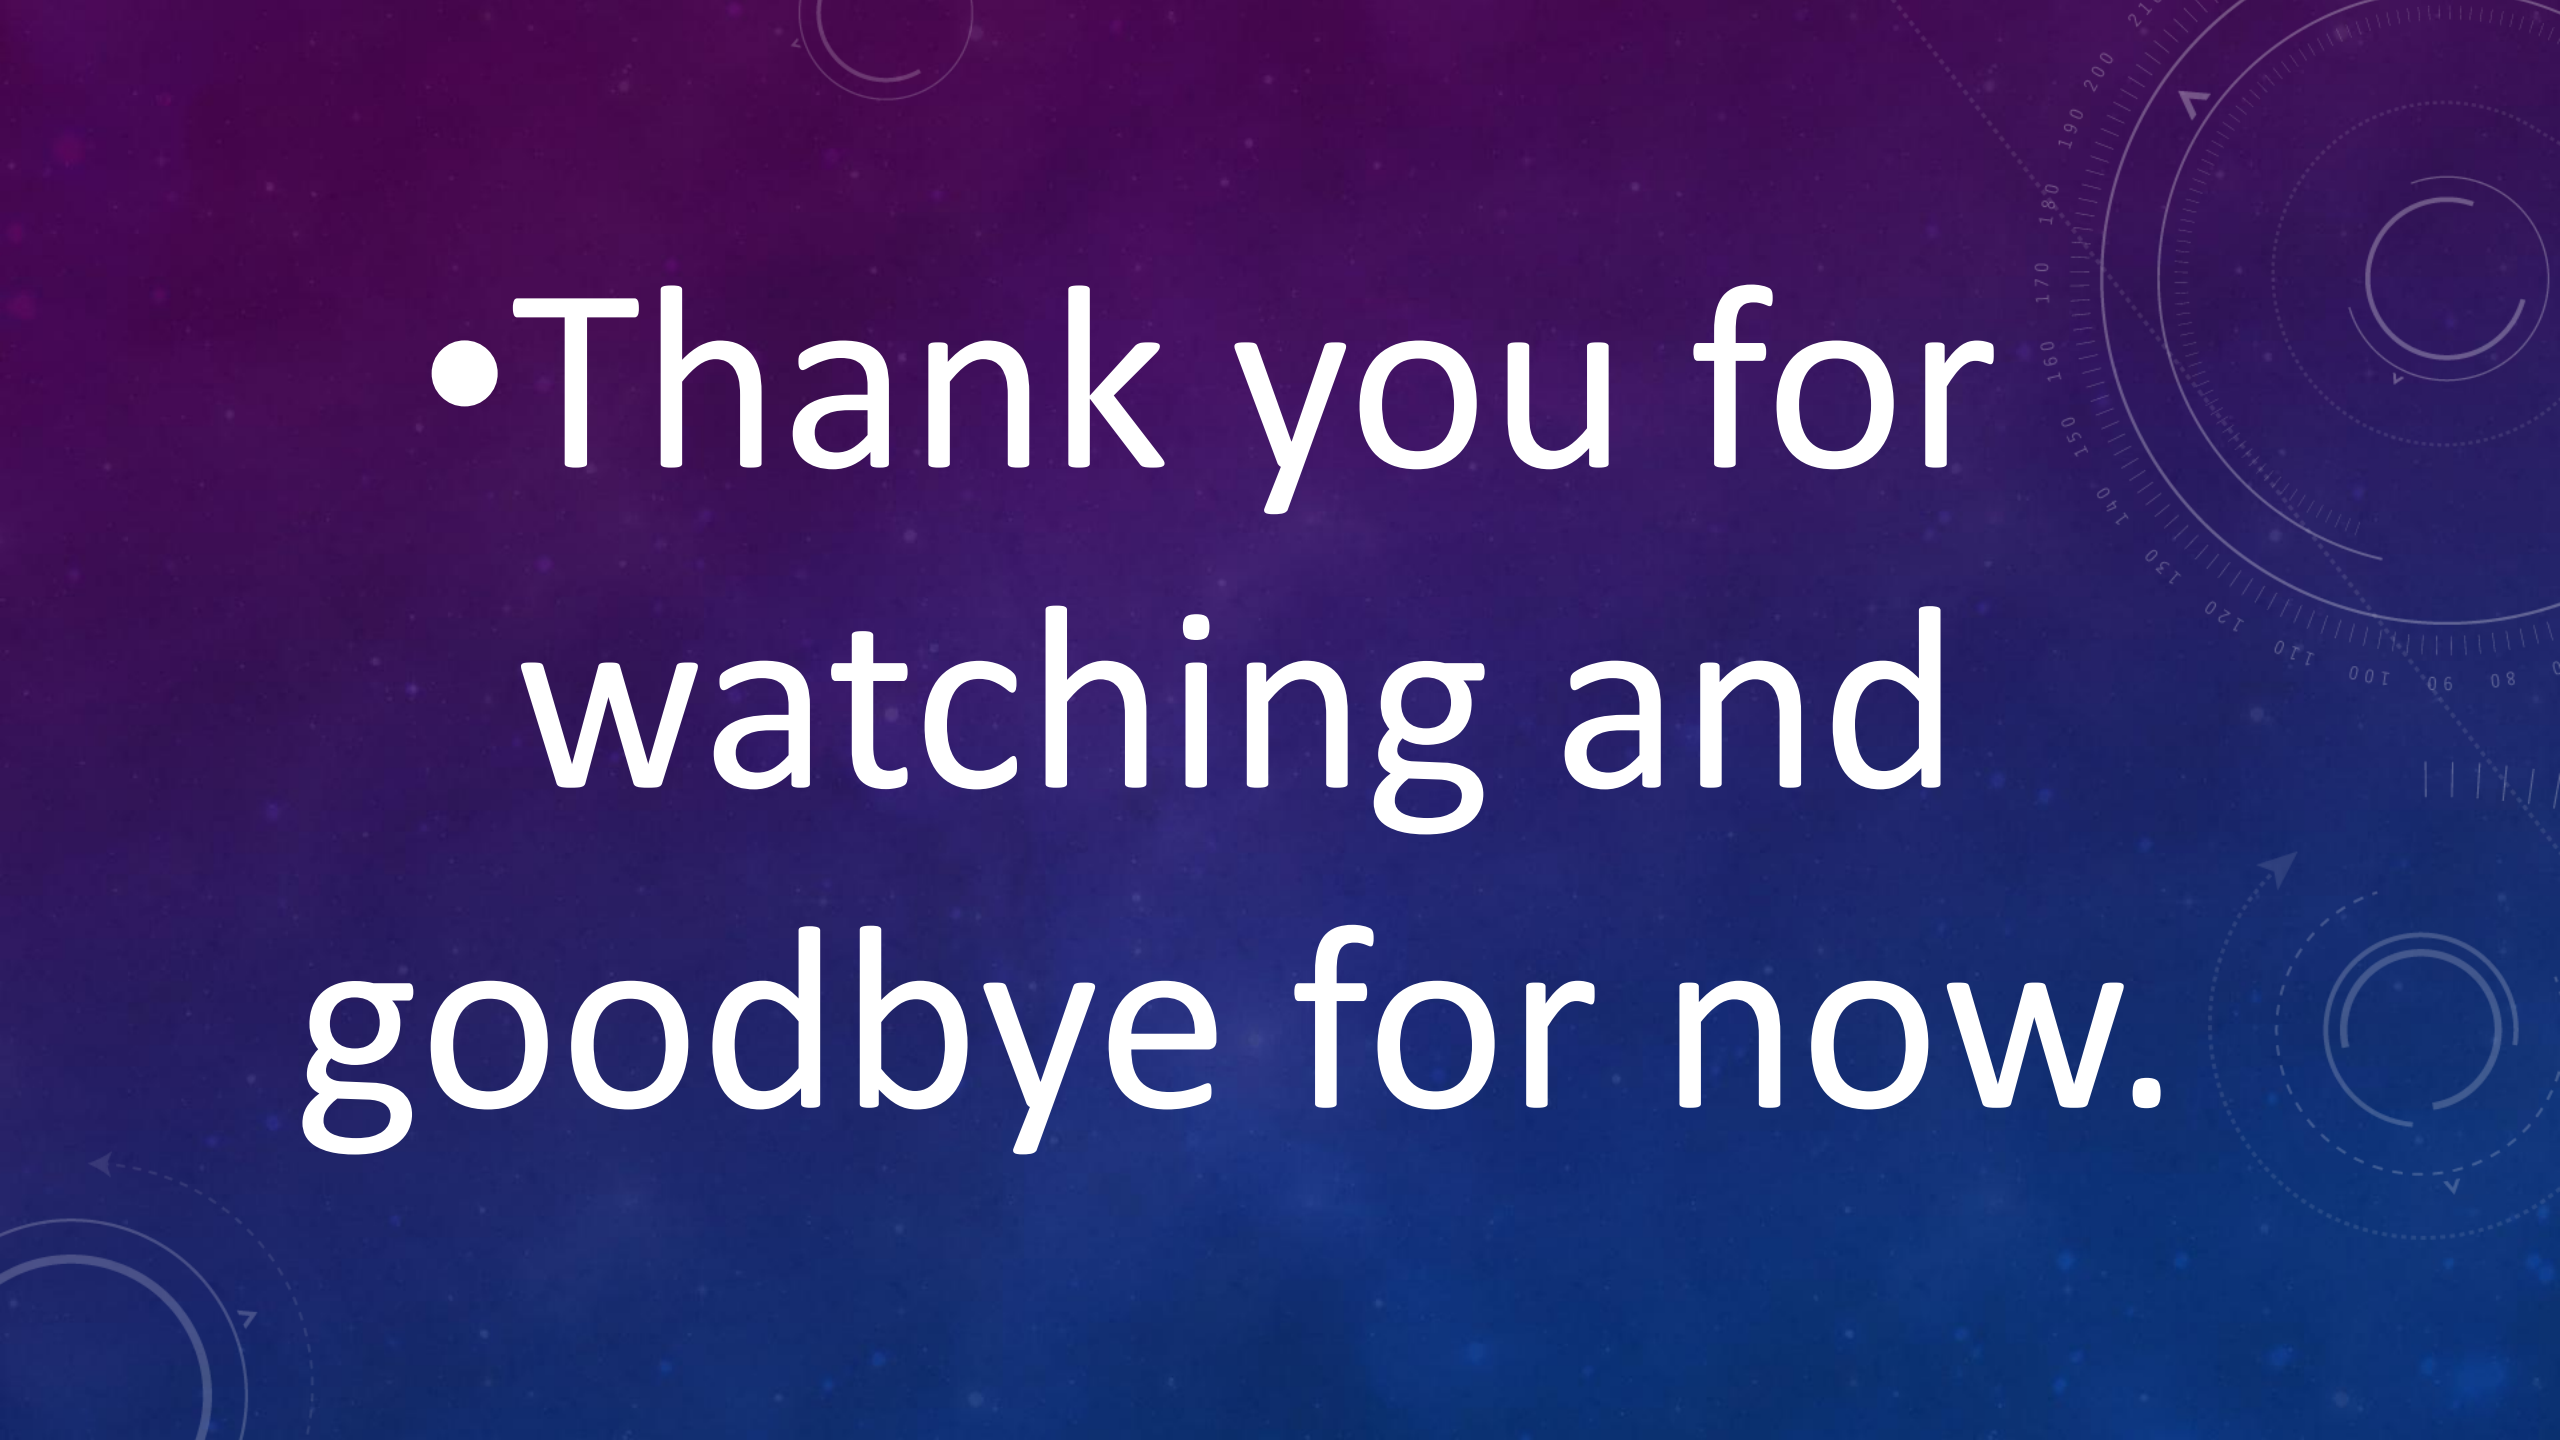

The tiger is the largest wild cat species in the world, easily recognized by its reddish-orange fur and unique dark vertical stripes. there's around 5500-5700

Left in the world

HOW CAN WE STOP EXTINCTION AND DEFORESTATION

- We can recycle paper to prevent trees from getting cut down.
- We can make sure we buy takeaways in recycled packages.
- We can reuse our plastic bags.
- We can make sure that we don't buy things made from real animal fur.

- Thank you for watching and goodbye for now.
