

Scientist

I will be able to:

- Explore ideas and raise different kinds of questions
- Plan a scientific enquiry using a fair test
- Use and develop keys and other information available to identify, classify and describe living things and materials
- To identify patterns
- To be able to take measurements, choose appropriate equipment for measuring and be able to use it accurately
- Gather and identify data that supports or refutes my ideas
- Recognise which other resources will be useful when researching ideas.
- Use scientific vocabulary and to be able to clearly articulate my findings
