

PARENT GUIDE

Getting started with the app

1

Install the Eduspot mobile app

The Eduspot mobile app (previously Groupcall Xpressions) is available on the App Store for iPhone/iPad and Google Play for Android devices.

2

Open the app and enter your email address

The contact details you provide **must match your school records**. If you are unable to enter details successfully, please speak to your school office. Your school records may need to be updated.

3

Enter your mobile number

When you have entered details correctly, you will receive a text message to your mobile phone containing a 6-digit code.

4

Enter the verification code

If you do not receive a code after waiting for a few minutes and making sure you have phone signal, use the "Resend Code" option to send another one.

5

Create a password (recommended)

We recommend you create a password at this stage. If you need to login again, or on another device, having a password will make the process easier.
