

# Divine Buzz in Partnership with The London Community Foundation

# Divine Buzz and The London Community Foundation

With the support of the London Community Foundation,  
Divine Buzz organised and took the children and their  
families to the Science & Natural History Museums in  
London

An exciting adventure!

# About Us

## Vision

Our vision is to reduce isolation and loneliness and work toward a cohesive, integrated community with few instances of solitude.

## Mission

To empower women, children, and their families through physical exercise, social and educational programmes that promote physical health, mental well-being and personal development.

Working together for a better community

Divine Buzz and Peabody are working together to support the community

We are providing families with:

A complementary family trip to The Science Museum London

Date: Wednesday 01/06/2022  
Meeting point: Hawksmoor Youth Club, Bentham Rd, London SE28 8AS  
Meeting Time: 9 AM, Departure: 09:30 AM  
*Travel by bus to North Greenwich, then take the Thames Clipper to Westminster Underground Station, and then take the District line to South Kensington for the museum.*

Please contact 07951922324 for any inquiries.

Book your family spot at: <https://divinebuzz.co.uk/> under the Contact page

Please note there are limited spaces.

Have fun with your children on this exciting trip!

The London  
Community  
Foundation

THAMESMEAD <sup>TM</sup>

HAWKSMOOR  
YOUTH CLUB

## Our ethos

- Supporting the lonely and isolated to meet new people, form friendships and connect to our wider community.
- Selfless attitude, belief in everybody, and creating individual true success story.
- Standing firm, one step at a time, progress before perfection.
- Have fun while acquiring new skills and knowledge
- Working together to build the core of our muscle groups and setting course for self-maintenance and care.

# Transport

## Using different modes of transportation around London Cruise on the Thames

We planned our travel modes to include the bus, the Thames Clipper and the Underground so that the children and their families could experience different modes of transport

For most of the parents and children, it was their first time to experience the river boat and it was all very exciting and enjoyable for them.

# Lunch on the River

We had our lunch on the Thames Clipper which was such a nice experience as the boat swished along the River Thames.

# At the Science Museum

Posing for the cameras

The children learned & gained knowledge of different inventions and how these inventions have evolved over time.

# At the Natural History Museum

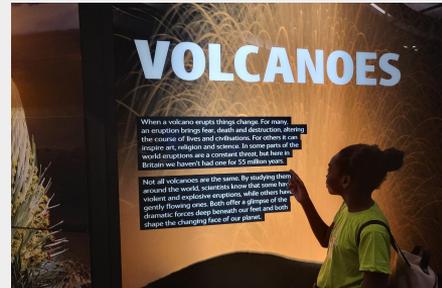

We also visited the Natural History Museum where the children experienced the dinosaur in action, they learned about different types of fossils and also different types of natural disasters and their impact on humanity.

We hope you enjoyed your visit

I came, I dinosaur, I conquered

# The Science Museum Trip Photo Gallery

What an experience

# The Natural History Museum Photo Gallery

The past came back to live

# What have we learned

The children in our community need exposure to certain sites and places for them to contextualise what they learn in class

The exposure shapes the children's understanding in a way that is much more informative than if they only relied on classroom knowledge

The children discover a much wider world out there compared to what they are accustomed to in their immediate environment

We also discovered that many more families than we anticipated were looking for the opportunity to visit such places.

Keep to smaller groups

To manage our time better

**IT IS ALL ABOUT  
SERVING THE  
COMMUNITY**

# What could have gone better

The projects made a big difference in our communities, however, things would have been better if:

- We could have had the ability to take everyone that showed interest in the trip
- Arrange a better travelling time which was less busier

# What would you do differently next time

## Some of the things that we would do differently are:

- Plan for smaller and much more manageable groups
- Reminding participants of time constraints and sticking to the scheduled times
- Planning smaller but multiple trips to the same places

# What the women are saying

Time management, otherwise, you are doing fantastic work and I'm very proud of you. Keep it up, what you are doing to support your community and vulnerable people is a noble cause. I have been inviting some people to join because it will be very beneficial to them and their young children. Well done 👍

We thoroughly enjoyed this trip, great experience

Our trip was a great experience for all the children by transporting in different <sup>kinds of transportation system</sup> ~~vehicles~~ <sup>vehicles</sup> Myself and children really enjoyed the trip to History and Science ~~Museum~~ <sup>MUSEUM</sup>. It was a wonderful experience that will last a life time. The boat Cruise was another outstanding experience. I wish ~~the~~ will have more of these. We are looking forward to more trips and to explore. (Age).

Every aspect is very okay to me

My children enjoyed the trip so much especially my 7 year old. What she enjoyed the most was her having a go at generating wind energy, seeing the bulb light up after she worked hard to rotate the device was good to see.

Catherine (Mum).

My kids, age 4 & 7 went on a trip with Divine Buzz to the London Science museum. They could not stop talking about how exciting it was. It was their first time on a boat & also their first time into central London. The museum too was fun as both of them loved the dinosaur exhibit. A big thanks to the team for exposing them to such fun. Thanks Elizabeth

# The difference the project made to the community

The trip have made an impact in the community

- The children and their families bonded
- They learnt new things and gained knowledge on old and new creations
- They also had a lot of fun going on the trip together, seeing exciting sites and scenes
- They have learnt to use different modes of transport that they would normally not have used
- They have made new friends, reduced screen time
- Learnt how mankind has evolved

# Concluding remarks

Divine Buzz is a community charity that supports and empowers resident women and children. Our goal is to support each other through fitness sessions, educational and social programmes to come out of isolation and loneliness.

## → Milestones

Since securing the funding, Divine Buzz has been able to make impactful contributions in the community bringing women and children from different ethnicities together and promoting community cohesion and a sense of belonging and pride in our diverse community

The funding has enable us to expose the children to new environments and this has widened their understanding of different aspects in their lives

## → Highlight

**One of our highlights was seeing so many Dads getting involvement in the trip, good bonding experience overall. More so, one of the children expressed his excitement at having used three different modes of transport to visit the exciting Science Museum and he could not wait to share it with his classmates**

## → Support

Divine Buzz is thankful for the support that we received from the London Community Foundation, Divine Buzz management, staff, volunteers, and our participants.

## → What's next?

We have been inspired by the number of response, the positive feedback and encouragement we are getting from the participants. We hope to continue enriching the experience of the community and we look forward to more future trips

**LET'S DO THIS!**

**One step at a time, progress before perfection**
