

TEAM

O³ Foundation / NPDCTS TM

Vision

Our vision is the building of a sustainable world where everyone is empowered to protect the environment and ensure equity, inclusion, and sustainable development.

Mission Statement

Our mission is to empower individuals and communities to protect the environment and promote equity, inclusion, and sustainable development. We strive to foster a sense of responsibility towards the environment and to ensure that everyone has equal opportunities to participate in creating a sustainable future.

Core Values

Sustainability

We value sustainable practices that ensure the well-being of the environment and society.

Equity

We believe in levelling up and providing equal opportunities to all individuals, regardless of their background.

This is targeted at the achievement of a sustainable future.

Inclusion

We promote diversity and inclusion by recognizing the value and contributions of all individuals in creating a sustainable world.

Collaboration

We believe in working together with individuals, communities, and organizations to achieve our shared goals.

Accountability

We hold ourselves accountable for our actions and strive to maintain transparency in all our endeavours.

Objectives

- Develop and implement **community-led waste management programs** to reduce environmental pollution and promote recycling and upcycling, while creating income-generating opportunities for women, youths and marginalized groups
- Raise awareness and education levels on **environmental health issues**, including pollution, climate change, and waste management, to empower communities to take action.
- Promote **women and youth economic empowerment** through skills training, financial literacy programs, and access to credit and financing to reduce poverty and promote gender equality.
- Raise awareness and advocacy efforts to address **gender-based crimes and violence and discrimination** and promote women's rights and equality.
 - Provide education and training on **climate change adaptation and mitigation** in communities, including information on **renewable energy, sustainable agriculture**, and natural resource management and land management practices that reduce greenhouse gas emissions and **enhance food security for women and smallholder farmers**.
 - **Partner with local governments and communities** to establish and enforce environmental health regulations and policies to **improve community health and well-being**.
- Support the establishment of **green businesses and social enterprises** led by women and youths to promote sustainable economic development and address climate change.
- **Conduct research and publish reports** on the relationship between environmental factors and community health outcomes, to increase awareness, **promote evidence-based policymaking**, and **inform the public** about the impact of environmental pollution on human health.
- Partner and **collaborate with like-minded agencies and organizations**, including government agencies, community groups, and international organizations, to leverage resources, **share knowledge and expertise**, and increase the impact of environmental and community health programs.

Areas of Intervention

- Environment and Climate change
 - Women, children and Youth
 - Health and nutrition
- Agriculture and Food Security
 - Gender equity
 - Poverty Reduction
 - Agriculture
 - Green Energy

Intervention Strategies

- Research and Environmental Monitoring.
 - Advocacy and lobbying.
- Education and Awareness Campaigns.
 - Community Engagement.
- Vocational training and Skill acquisition.
 - Press release/ publications.
- Conference/workshops/seminars
