Re: Acknowledgement of your commitment and contribution to Education for Sustainable development

Dear Sushita,

I am writing to recognise and acknowledge your commitment to ESD and the UNESCO World Conference on Education for Sustainable Development , organized in Aichi Nagoya, Japan from 10 to 12 November 2014 as well as your contribution as National Evaluator for the above programme which ran from June 2015 until the end of 2015 in Mauritius.

Your personal efforts towards the momentous reformulating of global education for development policies are greatly appreciated particularly given the demanding workloads we all faced.

Your contributions and the work that you have done with African colleagues over the years feeding into the World Conference resulted into precious insights that were acknowledged especially during the cluster discussions on ICT in Education and 21st Century Competencies.

Climate change education is a powerful tool to help people understand the causes and consequences of climate change, prepare students to live with its impacts, and empower them to take action on its causes. Your efforts to carry out the evaluation exercise of this programme in the different selected schools in Mauritius were noteworthy. Your insights into the different strategies and your account of country experiences and a review of policy documents, contributed significantly to UNESCO's five recommendations for policymakers on how CCE and ESD policies can be integrated at the national level and articulated into curricula.

I wanted to ensure that I personally wrote to you to note your commitment and dedication. We look forward to your continued association with UNESCO.

Yours sincerely,

Julia Heiss
Education Programme Specialist
UNESCO Regional Office for Southern Africa
