THE TOLAD WALKING STICK URN

The TOLAD is a hiking staff filled with your loved one's ashes.

With each step, a small amount of ashes is released from the lower end of the staff.

As a result, the TOLAD makes it possible to scatter ashes gradually while taking a walk.

This method is subtle, dignified, and safe under any weather conditions.

Take your loved one for a final walk around their favorite place.

*"Saying farewell...
... one step at a time."*

3765

THE BONSAI URN

3766

The BONSAI URN is a portable solution which gives you a new option to honor your loved ones with growing memories.

This beautiful porcelain ceramic urn utilizes our patented growing system that allows you to grow a lovely Bonsai Tree or other plant of your choice.

The roots will slowly grow into the cremated remains, adding sustenance to the environment and your loving memories.

The Bonsai Urn is designed to handle the cremains of most people and pets.

LIVING URN

3767

The Living Urn® comes with an actual living seedling, or baby tree. Planting a living seedling makes it easy for non-expert growers to successfully grow a healthy, enduring tree.

You are provided with approximately 20 tree options, chosen specifically for you based on your zip code. The living seedling is sent right to your doorstep.

You may also purchase the Living Urn without a seedling and purchase your own tree, plant, or flowers at a local nursery.
