2Pak *50/50 Hybrid* *9 weeks* *f1 Hybrid*
- *Vintage Pakistani x '79 Christmas Tree Bud*. All eyes on this one, not named after the rapper, it's just a *Hail Mary* for a name but *life goes on*. Both parents hail from Pakistan. The VP is a sativa, that grows *shorty*, like it *wants to be an indica thug*. While the CTB plants can get blue, screaming you *can't c me*, as squat indica plants that *keep ya head up*. Take a trip to *thug mansion* with this one as *only God can judge* and *I ain't mad at ya* if this one doesn't *get around*. All kidding aside, this is an awesome f1 hybrid that hits immediately with a nice cerebral high and the body high comes later.

Over Yonder *Sativa* *9 weeks* *f1 Hybrid*
- *Vintage Pakistani x Big Sur Holy Weed*. Vigor is the name of the game on this Plant Time Genetics creation. The VP has some freakish vigor and it gets compounded with the influx of the BSHW genes. Impasse *50/50 Hybrid* *9-10 weeks* *f1 Hybrid*
- *Kashmir Azad x Over Yonder*. Another Plant Time Genetics creation using the Kashmir. Impasse grows fast! Very vigorous plant, with very big yields. Great structure too. Terps are really unique, with smells of Big Red Soda.

Rajasthan Space Probe *Mostly Sativa* *11-12 weeks* *f1 Hybrid*
- *Rajasthan Sikar x Kashmir Azad*. This is a Bodhi Supernatural Selection release, featuring the Kashmir as the dad. The Rajasthan from India, is known to flower in 120 degree weather! Should fit right in here in Oklahoma. Sprite terps after long flowering times make it well worth it.

The line has some very good strains for making hash and Bodhi crossed a selected female with his '88 G13/Hash Plant male in his 6th version of hash plant remixes. The G13/HP crosses bring strong indica hash plant traits & high THC. The Iraqi Ranya adds more of a fruity smell and flavor profile to the earthy 88G13HP. Real hardy plant and nice yields.

Northern Light5 #8 *Mostly Indica* *8-9 weeks* *f2 Polyhybrid*
- *'89 Northern Lights #5 "Noof Cut" x BCSC Northern Lights #5*. Remember the Sensi Seed catalogs back in the late 80s, early 90s? If you don't, check out our "pictures" page on this website and you'll see what the Noof cut is. She's the plant in those pictures, the poster child of Northern Lights #5. Bodhi got a clone of this plant and crossed it to the British Columbia Seed Company Northern Lights #5 male he selected to rejuvenate the Northern Lights genetics. We open pollinated a pack of those seeds to offer f2 seeds (listed below) and some f2 selected cut here. These plants will get the classic NL "fade" resulting in pink, red, and yellow hues throughout. Beautiful, strong, and nice to breed with. The NL influence really re-awakens this classic Jack Herer line. Could be our biggest yielder too! This #1 plant is a dead-ringer of the original Jack Herer in Amsterdam from '98. Tastes like a lemon, black licorice and pepper fusion. Gives you a big time uppity high with a slight haze like the original. Great plant and super vigorous. Easy to grow for beginners. Shorter flower time than Jack Herer.

Similar soaring Jack high with some haze. Nice yields and grows more squat than the #1.

'91 Christmas #5 *Slightly Indica* *9 weeks* *f1 Polyhybrid*
- *'91 Chem Skunk Va (Chemdog) x '79 Christmas Tree Bud*. Really cool cross from Useful Seeds that we expect big things from. This might be one of the best versions of Chemdog that you can find because of the influence of the Christmas Tree Bud from Pakistan. The Chemdog is reported to pop nanners (go hermaphrodite) if pushed to hard or stressed too much. We believe the Pakistani genetics might have helped with this and have seen no sign of nanners in our "torture chamber" grow room. Be careful though, this is strong meds and can stink up your entire neighborhood if you're not careful. If smell is something you are worried about, don't grow this plant!

- Granny Skunk** *Slightly Indica* *8-9 weeks* *f1 Polyhybrid*
- *Virginia Beach Afghani x Skelly Hashplant x SSSC Skunk1*. Old school skunk smells come from these plants, the kind of smell you get from passing a skunk on the highway. A real delight from Dominion Seed Co. Awesome stony high that is still functional. Great addition to any garden.

CTB should bring in more indica effects and pine smells with additional structure & yield. Made in Oklahoma.
- Can't Touch This** *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- *Jack Light5 #3 x '79 Christmas Tree Bud.* Our passionfruit cut meets pine trees here in this mix up. Terps should be off the wall loud with pine and fruit smells. People are going to ask what that is and you'll have to tell them you "can't touch this." Made in Oklahoma.
- 2Pak** *50/50 Hybrid* *9 weeks* *f1 hybrid*
- *Vintage Pakistani x '79 Christmas Tree Bud.* We've been thinking about this one for quite awhile now and glad to finally release it. 2Pak is a 2 way Pakistani delight of old school superstars, one being a sativa and the other a pure indica. We imagine we'll find some delightful expressions here in these beans that should be reminiscent of what folks were smoking back in the day. Made in Oklahoma.
- Let's Go** *Mostly Sativa* *9-10 weeks* *f1 hybrid*
- *Sannie's Jack #8 x Too Buku.* Let's Go is an appropriate name for this cross as the plants will jump out of the pots on you and once you consume them, you'll be saving "let's go." Sativa rush with big yields from both parents should result in some interesting phenos here.
- High Maintenance** *Slightly Indica* *9 weeks* *f1 polyhybrid*
- *King's Banner XIII x Kashmir Azad.* Awesome OG meets the male Kashmir Azad, due to dish out some dense OG flavors with some greasiness. Everyone is working with this Kashmir line now for a reason. It brings out really cool traits in everything it touches.
- Honey Bunny** *Indica* *9 weeks* *f1 hybrid*
- *Kashmir Azad #1 x '79 Christmas Tree Bud.* Indica worlds collide again here with our Kashmir mom that oozes greasy nugs and our pine smelling bud, originally from Pakistan. Both indica plants give more of a dreamy euphoric type indica buzz with less narcotic couch lock than other indica strains. Should get a range of effects with this f1 cross, increased yields, and a range of smells.
- Mined Flayer** *Indica* *9 weeks* *f1 polyhybrid*
- *Stonemason x Monkey Balls.* Indica powerhouses combine here with one of our local favorites, the Stonemason. Both are knock out indica strains and the Stonemason brings a little better flavor to the Monkey Balls blandness. Good luck staying awake with this one!
- Load Off** *50/50* *9 weeks* *f1 polyhybrid*
- *Pineapple Thai x Monkey Balls.* This is our attempt to bring a more sedative quality to the Pineapple

Thai to hopefully increase the hash yields. Pineapple leaners and the ones we're looking for here and they should stand out soon, even in veg, with a quick stem rub. If your fingers smell sweet, you got it!

Strawberry Grease *Mostly Indica* *9 weeks* *f1 polyhybrid*
- *Strawberries & Cream f2 x Kashmir Azad*. Cannabis cup winner from Exotic Genetix meets the IBL from Kashmir that's making the rounds. Captain crunch berry terps should come out nice with the greasy buds produced by the Kashmir. Hold on to these.

Switchback *Slightly Indica* *9 weeks* *f1 polyhybrid*
- *Jack Light5 #1 x Kashmir Azad*. The OCC Jack Light5 #1 cut mixed up with the Kashmir is bound to be a winner. Look for some awesome fast growing plants of big yielding, greasy nugs with some old school Jack terps. Kashmir adds complexity to the Jack here. Dreamy euphoric high to be expected.

Final Curtain *Indica* *9 weeks* *f1 hybrid*
- *Monkey Balls #6 x Kashmir Azad*. Purple musky nugs of pure indica power collide with the awesome Kashmir line here. Expect some super dark phenos with quick vegging and fast flowering vigor.

Grease Pit *Mostly Indica* *9-10 weeks* *f1 polyhybrid*
- *Granny Skunk #4 x Kashmir Azad*. Granny brings the funk and Kashmir brings the grease. Skunk indica lovers are going to have fun with this one.

Waddle *50/50 Hybrid* *9-10 weeks* *f1 hybrid*
- *Big Sur Holy Weed #2 x Kashmir Azad*. Both these strains have get lost in your daydream kind of magic to them. Expect some awesome hybrid like highs and some vigor. Purple phenos too.

Outta Touch *Indica* *9 weeks* *f1 hybrid*
- *Purple Monkey Ghani x Kashmir Azad*. Find some greasy purple sweet phenos with this f1 hybrid. 100% indica cross so get ready to melt in your couch and do some daydreaming. Specimen beautiful plants await each pack.

Peaceness *Slightly Indica* *9-10 weeks* *f1 polyhybrid*
- *Huckleberry Web x Kashmir Azad*. The point of these is to bring a little more THC and indica effects to the **high CBD, low THC** Huckleberry Web mom. Plenty of fruity terps await with these, on what should be some very vigorous plants.
