September 2021

InBred Line (IBL) & Landrace Clones

STRAIN NAME (PLANT #)	TYPE OF EFFECT	FLOWER TIME	GENERATION
-----------------------	----------------	-------------	------------

Kandahar Afghan	<i>Indica</i>	<i>8-9 weeks</i>	<i>IBL</i>
<p>- Heirloom indica strain from a small village in Kandahar brought over in the 70s and kept preserved in California, given to Bodhi and sold through the Nierika Seed Trust. Great breeding tool and easy to grow inside or outside. Cool fade color when grown under LED. Popcorn nugs of pure indica smoke that's relaxing to the body but doesn't cause couch lock. Great for day or night time. Nice relaxing body high. Reported to help with insomnia and anxiety.</p>			

Monkey Balls (Deep Chunk) #15	<i>Indica</i>	<i>9-10 weeks</i>	<i>IBL</i>
<p>- A Tom Hill original creation of Deep Chunk bred in the US for over 20 years and f2ed by Hazeman and named Monkey Balls. All turn color and have a musky type smell to them. But very strong body and sedative effects. Great for nighttime. Old Afghan line that's a very popular medical strain. Reported to be very dominant in crosses. #15 gets a beautiful blue/purple coloring to it.</p>			

'95 Silver Haze	<i>Sativa</i>	<i>11 weeks</i>	<i>IBL</i>
<p>- <i>Silver Pearl x Haze</i>. 1989 High Times cup winner and one of the all time greats in cannabis. Super clear headed high awaits you in this plant, that was kept in line by the Nature Farmer for all these years. This cut can be ready fast for a super sativa, at only 11 weeks. "Lovely loud sharp sassafras Haze funk that is purely spice funk goodness, dead on old school root beer concentrate or pure raw sassafras root scent."</p>			

Oldtimer's Haze	<i>Sativa</i>	<i>16 weeks</i>	<i>IBL</i>
<p>- <i>Oldtimer's Haze</i>. From Ace Seeds: "Haze was developed in California in the 60's & 70's by crossing some of the best tropical sativas. This mythic sativa was close to disappearing from the breeding scene, due to the introduction of skunk and indica strains. Oldtimer's Haze population has been preserved intact until today by Oldtimer, a british breeder, and then reproduced by Ace." ***LIMITED RELEASE</p>			

'88 G-13 x Hashplant	<i>Indica</i>	<i>9 weeks</i>	<i>IBL</i>
<p>- <i>G13 x Hashplant</i>. Originally bred by Sensi Seeds back in 1988, this is the version by way of Hazeman, which has been kept in line. AKA 88g13hp, this plant has the allure of the G13 mom in the original f1, crossed to the Hashplant, which was an Afghan indica used for making hash. Results are knock-out power from a tough indica that grows squat and yields big. Perfect for indica couch lock crowd. Our cut has that Afghan muskiness, thick smoke, with a pleasant sweetness to it.</p>			

Balochistan Red Stem (Shidi Bhang)	<i>Sativa</i>	<i>8-9 weeks</i>	<i>IBL</i>
<p>- <i>Balochistan Heirloom</i>. Very unique line, by way of Irrizinig, that is from a desert like region in southeast Afghanistan. Farmed for generations in these desert like conditions, these plants are tough. Flower time is fast for the sativa like effects. Faint grape juice like taste and smell to these. Lung expanding smoke, No ceiling on these with a creeper effect. And if you smoke too much, you could find out what they mean when they call this line "Impending Doom."</p>			

****All clones are \$25.95 each. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

True f1 Hybrid Clones (IBL or Landrace crossed to a different IBL or Landrace)

- Too Buku #26** 50/50 Hybrid 8 weeks f1 Hybrid
- (Vietnam Black x Thai) x Herijuana. 3-way f1 Hybrid from Mantis Medgrower, created in Sonoma, brings two powerhouse strains together for that classic Sativa/Indica f1 hybrid. Herijuana dom. **Very strong cannabis** that you will feel instantly. Can cause daydreaming, disassociation, etc. Test results have been reported up to 26% THC and up to 11% CBD.
- Too Buku f2s** 50/50 Hybrid 8-9 weeks f2 Hybrid
- Too Buku #26 x Too Buku #27. These are the f2s from the Too Buku f1 line. As we explore these f2s, we'll release a few here and there that grow well and stand out. So far, we're seeing even more vigor in the f2 line and some different terps are coming out, along with less branching and more indica like growth. #12 and #13 are both very similar, and are a little louder, fruitier expression of the #26.
- Dread Bread #4** 50/50 Hybrid 8-9 weeks f1 Hybrid
- Mango Biche x Old Mother Ghani. Supernatural Selections creation of a Central American favorite, considered the Blue Dream of the region because it grows great everywhere, crossed to the Afghani male. Huge plants with great yields. Mango dominant pheno. Testing up to 24% THC.
- Purple Monkey Ghani #2** Indica 8-9 weeks f1 Hybrid
- Monkey Balls #6 x Kandahar Afghan. Indica lovers f1 dream right here folks. Expect big yielding, heavy hitting Afghan power from this plant. Easy to grow and almost bulletproof. This is a true f1 cross, born & bred in Oklahoma by Plant Time Genetics. Rumored to be Joe Exotic's favorite strain.
- Buku Ghani #4** Mostly Indica 8-9 weeks f1 Hybrid
- Too Buku #26 x Kandahar Afghan. Afghans dominate in this 4 way f1 cross. (Vietnam Black/Thai x Herijuana) x Kandahar Afghan has a double Afghan influence because of the Herijuana side. Herijuana is half Petrolia Headstash, a pre-soviet Afghan. Built like a tank this plant is super hardy and gets some added growth from the little sativa influence. The Kandahar brings out the ancient in Afghans. Think dinosaur kale of cannabis with these. Big yields, hardy, bulletproof, knock-down, thank you ma'am cannabis. Born & bred in Oklahoma by Plant Time Genetics. ***LIMITED TIME
- God's Paintbrush** 50/50 Hybrid 10-11 weeks f1 Hybrid
- Ethiopian Paintbrush x Old Mother Ghani. Why is it called paintbrush is one of the first thoughts that come to mind. Then you see the pictures and you see why. Another home run from Bodhi in his Supernatural Selections label featuring this standout Ethiopian mom. Longer flower times are worth it for the canna connoisseur. Skilled, patient growers should turn these into art.
- Grey Area** Slightly Sativa 9-10 weeks f1 Hybrid
- Too Buku #26 x Big Sur Holy Weed. Plant Time Genetics creation of two favorites for you sativa loving hard workers. Too Buku brings some frosty yield, CBD potential and unique terps to the hard hitting sativa profile of the BSHW IBL.
- Hawaiian x Columbian x Afghan** Slightly Sativa 10 weeks f1 Hybrid
- Hawaiian x Columbian x Afghan. Pretty cool, limited, 3 way F1 cross by Supernatural Selections we'll keep around for awhile. Has some nice funky smells from the combination of genetics with the slight fruit of the Hawaiian and the Columbian mixing nicely with the musky Afghan.

****All clones are \$25.95 each. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

- Over Yonder** *Sativa* *9 weeks* *f1 Hybrid*
- Vintage Pakistani x Big Sur Holy Weed. Vigor is the name of the game on this Plant Time Genetics creation. The VP has some freakish vigor and it gets compounded with the influx of the BSHW genes. If you are looking for a fast vegging and fast flowering sativa this could be the ticket. Sweet BSHW tastes with a floral essence from the VP.
- Stumble** *50/50 Hybrid* *7-8 weeks* *f1 Hybrid*
- Kashmir Azad x Too Buku. This is what we've been looking for from the Too Buku side, a fast finishing plant! These look ready at 42 days, but go ahead and wait another week or two! Smells of skunky sweet permeate, with trichomes abound. Created by Plant Time Genetics here in Oklahoma.
- Impasse** *50/50 Hybrid* *9-10 weeks* *f1 Hybrid*
- Kashmir Azad x Over Yonder. Another Plant Time Genetics creation using the Kashmir. Impasse grows fast! Very vigorous plant, with very big yields. Great structure too. Fast hitting sativa like effect that eventually lead to a nice relaxing body high. Terps are really unique, with smells of Big Red Soda.
- Rajasthani Space Probe** *Mostly Sativa* *11-12 weeks* *f1 Hybrid*
- Rajasthani Sikar x Kashmir Azad. This is a Bodhi Supernatural Selection release, featuring the Kashmir as the dad. The Rajasthani from India, is known to flower in 120 degree weather! Should fit right in here in Oklahoma. Sprite terps after long flowering times make it well worth it.
- Bye Felicia** *Slightly Indica* *8-9 weeks* *f1 Hybrid*
- Nigerian Sunshine x '79 Christmas Tree Bud. Unreleased Plant Time Genetics cross featuring a nice yielding Nigerian with the squat blue Christmas Tree Bud. Bye Felicia **hits hard** & fast. The name says it all. Skunky chem like gas terps. See ya.
- Polyhybrid & Backcross Clones**
- Nikah** *Mostly Sativa* *9-10 weeks* *f1 Hybrid*
- Triangle Kush x Old Mother Ghani. Frosty pheno of the famous kush clone from Florida crossed to a super potent old-school Afghan male by way of Bodhi. Grapefruity gas/OG terps jump out at you on this easy to grow plant, that gets tall and produces nice sized buds that have tested up to 27.9% THC.
- Love Triangle #24** *Slightly Indica* *10 weeks* *f1 Polyhybrid*
- Triangle Kush x Snow Lotus. Love Triangle is a spectacular plant with great yields and the most unique strawberry/cherry like playdoh tasting buds. Try this and you'll always have a cut in your garden. Great mellow easy going daytime friendly high. Grows more lanky/sativa like. #28 is the 'Luden's pheno.' Test results up to 26% THC, with rosin and dry sift yields over 20%.
- Gorilla Biscuit** *Mostly Indica* *8-9 weeks* *f1 Polyhybrid*
- Sensi Star Terpentine cut x Stardawg 195. Created by Seeds of Compassion. This strain is rumored to be very popular for commercial growers because of its super squat structure and large bud production. Real turpentine smell with a slight lemon in there. Short plant that's easy to grow with nice yields. Very strong cannabis with a highly desirable terp profile. Has tested up to 29% THC.
- OG Jack #11 (Tahoe OG Kush dominate)** *Mostly Sativa* *9-10 weeks* *f1 Polyhybrid*
- Tahoe OG Kush x Sannie's Jack Herer f6. Tahoe OG from Cali Connection 2011 Cannabis Cup winner crossed to the Sannie's flagship Jack Herer stud gives huge yields of OG flavor and nice robust

****All clones are **\$25.95 each**. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

Jack influenced structure. **#11 is more Tahoe dom** with a really unique Tahoe OG smell/taste mixed with a slight Jack Herer minty fresh taste. Expect more OG body indica like effects. Large yields. Created by Mantis Medgrower.

Northern Light5 #31 *Mostly Indica* *8-9 weeks* *f2 Polyhybrid*
- '89 Northern Lights #5 "Noof Cut" x BCSC Northern Lights #5. Remember the Sensi Seed catalogs back in the late 80s, early 90s? If you don't, check out our "pictures" page on this website and you'll see what the Noof cut is. She's the plant in those pictures, the poster child of Northern Lights #5. Bodhi got a clone of this plant and crossed it to the British Columbia Seed Company Northern Lights #5 male he selected to rejuvenate the Northern Lights genetics. We open pollinated a pack of those seeds to offer f2 seeds (listed below) and some f2 selected cut here. These plants will get the classic NL "fade" resulting in pink, red, and yellow hues throughout. Beautiful, strong, and nice to breed with. Males in this line seem to increase yield and strength, while giving way to the females tastes, look, and effects. #31 is more sweet + chem like terps/fast grower.

Pineapple Thai *Mostly Sativa* *8-9 weeks* *f1 Polyhybrid*
- *Pineapple Thai Clone x Jack the Ripper*. This pineapple thai cross was made by 707 Seeds in Sonoma and the #8 plant has the exact smell and similar growth pattern of the original mom. The original pineapple thai clone in Sonoma reportedly produces 15% THC and 10% CBD for the best daytime euphoria from the **3:2 THC:CBD ratio**.

Jack Light5 #3 (Passion Fruit cut) *Mostly Sativa* *10 weeks* *f1 Polyhybrid*
- *Sannie's Jack x Northern Light5*. In house creation from our own Mantis Medgrower matching up our old school 1998 Jack Herer line from Sannie crossed to the Northern Light5 from Bodhi featuring the Noof cut from 1989. The NL influence really re-awakens this classic Jack Herer line. Could be our biggest yielder too! This #1 plant is a dead-ringer of the original Jack Herer in Amsterdam from '98. The Passion Fruit cut was a very pleasant surprise. Don't let the Jack like smell fool you. Each exhale finishes in a nice passion fruit flavor in your mouth. Really awesome. Similar soaring Jack high with some haze. Nice yields and grows more squat than the #1.

'91 Christmas #5 *Slightly Indica* *9 weeks* *f1 Polyhybrid*
- *'91 Chem Skunk Va (Chemdog) x '79 Christmas Tree Bud*. Really cool cross from Useful Seeds that we expect big things from. This might be one of the best versions of Chemdog that you can find because of the influence of the Christmas Tree Bud from Pakistan. The Chemdog is reported to pop nanners (go hermaphrodite) if pushed to hard or stressed too much. We believe the Pakistani genetics might have helped with this and have seen no sign of nanners in our "torture chamber" grow room. Be careful though, this is strong meds and can stink up your entire neighborhood if you're not careful. If smell is something you are worried about, don't grow this plant!

Strawberry Goji *Slightly Indica* *9-10 weeks* *f1 Polyhybrid*
- *Goji OG x Strawberry Milk*. This is our Bodhi made strawberry strain entry in our "Strawberry Showdown." Almost guaranteed to put a new spin on the Strawberry strains. Goji is a very large yielding powerhouse of a plant crossed to his Strawberry Milk, with more Nepal OG influence. This one yields great for pressing too, hitting almost 24%!

Strawberries & Cream *Slightly Indica* *8-9 weeks* *f1 Polyhybrid*
- *Strawberries & Cream f2*. Exotic Genetix has been stacking up Cannabis Cups all around the country. Beautiful plants that are almost guaranteed centerfolds if grown correctly. Smells of Cap. Crunch berry.
*** LIMITED TIME

****All clones are \$25.95 each. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

- Kashmir Sunshine** *Mostly Indica* *8-9 weeks* *f1 Polyhybrid*
- Kashmir Azad #22 x Sunshine Daydream. Bodhi's selected Kashmir #22 must be a special plant and it's crossed here with his selected male from one of his most well know strains, Sunshine Daydream, which is showing promise as a very super fast growing unique specimen in this polyhybrid. Smells are blueberry muffin crossed with chem-carrot and spicy flowers. Super complex and should be great for terpy hash. #7= Sour Piss Pheno. #11= Pickles & Cheetos pheno.
- Granny Skunk** *Slightly Indica* *8-9 weeks* *f1 Polyhybrid*
- Virginia Beach Afghani x Skelly Hashplant x SSSC Skunk1. Old school skunk smells come from these plants, the kind of smell you get from passing a skunk on the highway. A real delight from Dominion Seed Co. Awesome stony high that is still functional. Great addition to any garden.
- Runtz** *Slightly Indica* *8-9 weeks* *FEMINIZED*
- Runtz x Runtz. Big time hype strain from Mike at Exotic Genetix, in the form of a selfed Runtz clone. See what all the talk is about with this candy flavor standout that's currently the "it" strain. Dense buds, fast flowering, and great terps await you with this plant. ***LIMITED TIME
- Attitude Adjustment** *50/50 Hybrid* *9 weeks* *f1 polyhybrid*
- Pineapple Thai x Too Buku. CBD worlds collide with this matchup. Pineapple Thai is reported to be in the 15% THC to 10% CBD range and the Too Buku has had very high test results in both THC and CBD. #1 is the PT leaner and the #6 is the TB leaner. Both have that "melt away your stress" qualities for that instant attitude adjustment we all need sometimes.
- Oil Spill** *Mostly Indica* *8-9 weeks* *f6 polyhybrid*
- XXX OG x Royal Kush 7. Original from Mandelbrot brings together 2 powerhouse OGs from the Emerald Triangle. The plants are very unique, stay squat and form tight, dense, frosty buds with dark coloring. In contrast with the trichome production the flower has excellent bag appeal. Light berry like and oil rag terps that have that California NorCal taste. Lung expanding flower!
- BiXkit** *Mostly Indica* *9 weeks* *f1 polyhybrid*
- Gorilla Biscuit x '91 Christmas. Gorilla Biscuit has consistently tested high in THC, up to 29%, and has those sought after lemon like chem terps. The '91 Christmas brings a nice addition and the combo produces these vigorous BixKit plants that have an Elmer's Glue like terp profile.
- 21 Candles** *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- Fruity Pebbles #21 x Roman Candles. Here's another one from Strayfox, featuring his selected Fruity Pebbles cut with his Roman Candles male. Colors will pop with the fade on these, where green leaves turn to red, purple, and yellow. Frost is abundant, but the real treat from the Fruity Pebbles mom comes through in the terps. 100% Fruity Pebbles cereal flavor and taste.
- TriRaqi Stash** *Slightly Sativa* *9 weeks* *f1 polyhybrid*
- Triangle Kush x Iraqi Ranya x Over Yonder. By Plant Time Genetics, the Over Yonder dad brings some color, more sativa like hazey high, and frost to the party. The TK x Iraqi mom is a beast, grows more sativa like, but with big buds up the poles. Nice Kush and cotton candy like tasting flowers await. Fade will include red, purple, and yellow colors that pop with the trichomes.

****All clones are **\$25.95 each**. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

Load Off *50/50 Hybrid* *9 weeks* *f1 polyhybrid*
- *Pineapple Thai x Monkey Balls*. By way of Plant Time Genetics, Load Off our first attempt to bring more indica to the PT. The Monkey Balls dad doesn't dominate this one, but lends it's big wide leaves in a very vigorous plant with nice yields, while still maintaining the special Pineapple terps. More indica effects included than the Pineapple Thai by itself.

Crippy *Slightly Sativa* *9 weeks* *f1 polyhybrid*
- *ECSD x Crippy*. If you smoked the electric lettuce in South Florida in the late '90s to early 2000's, you know what the deal is with The Crippy. A legend in the Miami area. This version, from Shoreline Genetics, is from a Cuban guy who gave Shoreline OG the seeds. The Crippy male really comes through on this cut, giving us a nice example of the old school Crippy. Very enlightening, uplifting high from a slight sativa that can last 2-3 hours. Tight buds with 3 shades of green. Long internode length and sativa like growth.

Gruntz *Mostly Indica* *9 weeks* *f1 polyhybrid*
- *Runtz x Kashmir Azad*. The Kashmir Azad is popping up everywhere because it's so special. Brought to the community a few years ago via Barefrog, a Canadian soldier, it seems to rub off something special to every offspring. Continuing that trend, try this Gruntz compared to the other Runtz outcrosses for more vigor, yield, and stronger flower.

Telescope Skunk *Slightly Indica* *9 weeks* *f1 polyhybrid*
- *Romulan (Mendo Joe cut) x Skunk #18*. Romulan needs no introduction, as it's considered the oldest clone that is still in existence. If you haven't had it before, it's a beast, with super unique terps and effects. Nature Farmer was able to coax out the best of Romulan out in this outcross.

Shoreline BX *Slightly Indica* *9 weeks* *Backcross*
- *Shoreline x (Shoreline x Crippy)*. Named after the Shoreline amphitheater where the Grateful Dead debuted, Shoreline is an old school treasure in Texas in the late 90's, early 2000's, if you had it. People still talk about Shoreline as being one of the strongest strains they ever had. Shoreline OG made this outcross with his Crippy male, and it is pretty awesome. Super lime like fuel skunky smells that will smell up a room when you open up the jar.

6 Mill *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- *Local H x Screaming Eagle*. Super loud release by Dominion Seed Co. "Gassy sour and grapefruit with skunky undertones. Fast hitting and creeper effect that follows. But don't just take our word for it, click [this link](#) for the breeder's story.

Big Chillz *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- *Big MAC x Chillz*. New release by the creator of MAC (Miracle Alien Cookies), Capulator. Old school almost "beasters" like bud of the mid 2000's come out in this cookies cross. One of our "Cookies Contest" contestants. If you want to try a real MAC relative, give this one a go and let us know which Cookies is your favorite. ***LIMITED TIME

Granola Funk Remix *Mostly Indica* *9 weeks* *f1 polyhybrid*
- *OG Kush Breath (OGKB) x Wookie*. OGKB is the mother of all the "Breath" strains you see out there. This is Bodhi's release using the Wookie male which brings terps, better growth/structure, and some oily frost to the table. Another contestant of our "Cookies Contest." Let us know which one is your favorite. Terps are bakery bread, cookies, and lavender funkiness. Very couch like relaxing effects.

****All clones are \$25.95 each. Buy 5, get the 6th for 1 penny! CASH ONLY - BUY "AS IS" - NO RETURNS
*NOT ALL CLONES IN STOCK.

Tokyo Sunset *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- *Gorilla Breath x Sunset Sherbet BX*. This is our Tiki Madman "Cookies Contest" release. Tiki is a newer breeder on the scene with some really standout specimen looking plants — Instagram stunners! The effects are unique as well as the terps too. Very nice rep in the contest. Let us know what you cookies fans think of this one.

Plant Time Genetics - Seed Packs -10 REGULAR SEX seeds (\$43.25 each pack)
Buy 3 packs of seeds, get the 4th pack for a PENNY!

Bardowski *Mostly Indica* *8-9 weeks* *f1 hybrid*
- *Too Buku #26 x '79 Christmas Tree Bud*. Sure to be a score with big city slams, mixing up the unique terps of the Too Buku with the pine tree aroma of the CTB. Look for large yields with major league vigor. Always bardowski. Made in Oklahoma.

Can't Touch This *Slightly Indica* *8-9 weeks* *f1 polyhybrid*
- *Jack Light5 #3 x '79 Christmas Tree Bud*. Our passionfruit cut meets pine trees here in this mix up. Terps should be off the wall loud with pine and fruit smells. People are going to ask what that is and you'll have to tell them you "can't touch this." Made in Oklahoma.

2Pak *50/50 Hybrid* *9 weeks* *f1 hybrid*
- *Vintage Pakistani x '79 Christmas Tree Bud*. We've been thinking about this one for quite awhile now and glad to finally release it. 2Pak is a 2 way Pakistani delight of old school superstars, one being a sativa and the other a pure indica. We imagine we'll find some delightful expressions here in these beans that should be reminiscent of what folks were smoking back in the day. Made in Oklahoma.

Let's Go *Mostly Sativa* *9-10 weeks* *f1 hybrid*
- *Sannie's Jack #8 x Too Buku*. Let's Go is an appropriate name for this cross as the plants will jump out of the pots on you and once you consume them, you'll be saying "let's go." Sativa rush with big yields from both parents should result in some interesting phenos here.

High Maintenance *Slightly Indica* *9 weeks* *f1 polyhybrid*
King's Banner XIII x Kashmir Azad. Awesome OG meets the male Kashmir Azad, due to dish out some dense OG flavors with some greasiness. Everyone is working with this Kashmir line now for a reason. It brings out really cool traits in everything it touches.

Final Curtain *Indica* *9 weeks* *f1 hybrid*
- *Monkey Balls #6 x Kashmir Azad*. Goodnight sweetheart would be another good name for this one, as it is lights out after a bowl of this one. Get some great vigor and as always some great looking plants when you add in the Kashmir. Great yields await you in an easy to grow and prolific indica.

Strawberry Grease *Mostly Indica* *9 weeks* *f1 polyhybrid*
- *Strawberries & Cream f2 x Kashmir Azad*. Cannabis cup winner from Exotic Genetix meets the IBL from Kashmir that's making the rounds. Captain crunch berry terps should come out nice with the greasy buds produced by the Kashmir. Hold on to these.

Fast Forward Series - Seed Packs -10 REGULAR SEX seeds (\$60.54 each pack)

Pineapple OG v2	<i>Slightly Indica</i>	<i>9 weeks</i>	<i>f1 polyhybrid</i>
- <i>Pineapple Thai x Triangle Kush x Iraqi</i> . Plants Time Genetics' first release of the Fast Forward Series, is a Remix of an old crowd favorite, the Pineapple OG. The pineapple terps from the PT come through perfectly with OG like terps. Basically, a terp salad made in heaven. (LIMIT 1 PACK PER PURCHASE)			
Carpet Ride	<i>Slightly Indica</i>	<i>9 weeks</i>	<i>f1 polyhybrid</i>
- <i>Purple Monkey Ghani x Triangle Kush x Iraqi Ranya</i> . Jump on the magic carpet for a carpet ride in OKC. Purple Afghan goodness collides here with the TK x Iraqi male. Expect nice yields and some colorful phenos.			
OG What	<i>Slightly Indica</i>	<i>9 weeks</i>	<i>f1 polyhybrid</i>
- <i>OG Jack #11 x Triangle Kush x Iraqi Ranya</i> . Bringing out some nice stuff here to the OG party, hold your horses because this should have some get up. OG Jack is a powerful sativa like take on the Tahoe OG and combining this to the kushy TK x Iraqi should bring bigger plants and some nice yields of OG goodness.

We recommend joining an online forum to learn more about organic gardening methods (and all other types of grow methods). You can find experts on these forums that love to help. Ask questions but use the search feature first. **It's all there and it's all free!*

TYPE OF EFFECT SCALE:

SATIVA = 100% "up" like effect, like drinking coffee. Get a lot done, motivating type effects.

MOSTLY SATIVA = energizing and refreshing but not as much of a jolt of energy. Great for exploring and being creative.

SLIGHTLY SATIVA = refreshing feeling, daydreaming. Less energizing if at all.

HYBRID = 50/50 sativa/indica effects where you could feel a rush of energy and then it fades to a body high or perhaps some other combination of sativa and indica effects at once.

SLIGHTLY INDICA = Relaxing type feel with not much body. No couch lock.

MOSTLY INDICA = Very relaxing slight body pain relief feel, can cause couch lock. Can cause drowsiness.

INDICA = All body feel, couch lock, pain relief, induces sleep.
