Columbia Gas to Begin Pipeline Upgrade Project in Dunlevy Borough, Washington County

Canonsburg, PA. – Natural gas customers in Dunlevy Borough, Washington County, are benefiting from a Columbia Gas of Pennsylvania pipeline replacement project that will ensure the delivery of safe, reliable, and efficient natural gas to them for years to come.

Columbia Gas is replacing more than 8,900 feet of underground pipe impacting customers throughout the borough. Construction activities will be focused on the following streets: **State Route 88, Church Street, Coal Street, Dewey Street, Frick Street, Mannina Avenue, Mulberry Street, Nellie Avenue, Second Street, Sphar Street, Walnut Street, and Wharf Street.**

Work will start at the beginning of September and is expected to last through the fall and into the new year. Construction will take place Monday through Friday from 7:00 a.m. to 5:00 p.m. Motorists can expect lane restrictions during working hours, and Saturday work is possible.

The construction work will require a temporary interruption of natural gas service for affected customers while their service is transferred to the new pipe. Columbia Gas will personally contact these customers prior to shutting off service and to schedule service restoration. Customers with indoor meters will also have their meters relocated to the outside of the premises. This, and other work on existing outside meters, will be completed at no additional cost to the customer.

All company and contract employees carry photo ID badges identifying them as Columbia Gas employees or contractors. Customers are encouraged to ask for ID before allowing anyone into their home, or they can call 1-800-543-8911 for Columbia Gas employee verification.

Motorists traveling through Columbia Gas work zones should exercise caution and be prepared for slowed or temporarily stopped traffic during working hours. Motorists should keep a safe distance between vehicles, reduce speed in work zones, and obey flaggers and all posted signs, including detours and parking restrictions.

Information on Columbia Gas of Pennsylvania's commitment to safety, including the importance of calling 811 before you dig, home and appliance safety, and steps to take if you smell natural gas can be found at www.columbiagaspa.com/safety.

About Columbia Gas of Pennsylvania

Columbia Gas of Pennsylvania delivers clean, affordable and efficient natural gas to approximately 442,000 customers. With headquarters in Canonsburg, Pennsylvania, it is one of NiSource's six regulated utility companies.
