

Special Attribute Development (SAD)

Do you find yourself struggling with boredom when you think about studies?

You know you got to study well, if not for anything else, for all the nagging your parents do, but then you get distracted the moment you start. Are you one among the people who keep postponing homework eternally? Do you feel your friends are much more capable than you?

“Believing that leaders are born, not made, like believing Sachin Tendulkar came out of the womb hitting a cricket ball, ready to win World cup. Great leaders, like great sports personnel, become the best they can be by first learning the skills they need for success and then by relentlessly practicing them.”

CRETA's main objective is to train students to enquire into the nature of events and existence, Guide them to analyze the how and why of occurrences, correlate facts, integrate information, synthesize knowledge, skills and values into applications, filter before a judgment and weigh the outcome before considering them.

Inculcate inter personal skills that foster mutual co-operation, respect for authority, loyalty towards family, friends and fellow citizens with a sense of responsibility that makes them sensitive towards the society and the environment.
