## HEALTH OFFICER ORDER FOR THE CONTROL OF COVID-19 ISOLATION ORDER

Date Order Issued: April 7, 2020

This Order is in effect until rescinded in writing by the Health Officer.

All individuals who have been diagnosed with or are likely to have COVID-19 must immediately take the following actions:

**Isolate themselves in their home or another residence until: (a) at least 3 days (72 hours) have passed since recovery, defined as resolution of fever without use of fever-reducing medications and improvement of respiratory symptoms (e.g., cough, shortness of breath). AND (b) at least 7 days since symptoms first appeared.** Until this time, they may not leave their place of isolation or enter any other public or private place, except to receive necessary medical care.

**Self-Isolation is immediately required if a person meets one or more of the following factors:**

- a. A positive lab test for COVID-19,
- b. Signs and symptoms that are consistent with COVID-19 (i.e., fever, cough, shortness of breath or trouble breathing). OR
- c. A physician has informed the individual that they are likely to have COVID-19.

These persons are required to self-isolate because a person infected with or likely to have COVID-19 can easily spread the virus to others. Isolation separates these ill individuals from others to prevent the spread of COVID-19. It protects everyone, including people who are high risk for serious illness, such as older adults and people with weakened immune systems.

**Isolated individuals must isolate themselves in a residence and follow all directions in this order until they are no longer at risk for spreading COVID-19 based upon the following criteria.**

- a. At least 3 days (72 hours) have passed since recovery, defined as resolution of both fever without the use of fever-reducing medications and improvement of cough, shortness of breath and other symptoms AND
- b. At least 7 days have passed since symptoms first appeared. OR
- c. Negative COVID-19 test.
