Director of Health and Social Services

Public Information Officer:

Richard Egan, CAO

LASSEN Cares Local COVID-19 Information

Lassen County Reopens After Six Days:

Lassen County Incident Command, the Public Health Department, and the county's Health Officer, Dr. Kenneth Korver, removed the health officers order from May 22nd. This order retracted the Attestation the county filed with the state to move from Phase 2a to Phase 2b for 7 days. Dr. Korver made this decision based upon the results of our first cases of community spread within Lassen County.

On May 28th, the Health Officer and the county administration removed the order after six days. During that time, members of the Public Health Department conducted an investigation for possible exposures in our community. This process is called "close contact tracing."

Incident Command are moving forward reopening the county working together with salon owners and places of worship. Public Health is requesting business owners complete the "Business Readiness Survey" on www.lassencares.org.

Lassen County COVID-19 Counts:

Known Cases	5
Pending	153
Negative	1,083
Total	1,241

***Note: Numbers have increased in response to the Drive Thru Testing Clinic

What happens after you have completed the Business Readiness Survey:

The survey acts as the businesses safety plan for both Public Health and the State.

Each business will receive the following from Public Health:

- Industry Guidelines
- Fact Sheets
- Resource Checklist
- Health Informed sign for their business

Update on the Positive Cases in Lassen County:

Update on the 5 Positive Cases:

To date, five (5) Lassen County residents have tested positive for COVID-19.

What happens when you are asked to quarantined?

Under the Health Officers Order from April 7th, someone who has tested positive of COVID-19 will be required to quarantine themselves in their home until at least 3 days have passed since recovery or at least 7 days since symptoms first appeared. The negative results of COVID-19 testing can also release a person from quarantine before the previously stated timelimes.

What is a close contact and what should I do if I am identified as one by Public Health?

A close contact is someone who has spent more than ten minutes within 6 feet of person who has or is likely

to have COVID-19 or had unprotected contact with the body fluids and/or secretations (such as being coughed on/sneezed on, shared utensils or saliva or provided care without wearing protective equipment) of a person who has or is likely to have COVID-19.

If you have been identified as being in close contact with someone who has tested positive for COVID-19, you will be asked to self-isolate and get tested.

When should I self-isolate?

Self-isolation is necessary because an individual is at high risk for developing and spreading COVID-19. It is necessary pending the test results for any individual with signs and symptoms that are consistent with COVID-19 (ex. fever, cough, shortness of breath, or trouble breathing) or if a physician or member of Public Health has informed you that you could have

been exposed and need to be tested.

How do I get food, medicine, and other supplies while placed on quarantine?

While being placed on quarantine, a member of Public Health will be in constant contact to make sure your needs are being met. Services like Lassen Rural Bus can pick up groceries and medications and bring them to your home. For more information call (530) 252-7433.

Are any of the cases hospitalized or require intensive care?

To date, no Lassen County residents require hospitalizations or intensive care. This is generally defined as someone staying in a hospital bed overnight or someone requiring the use of a ventilator or respirator.

Press Release for Containment:

The Public Information Team will work with Public Health to provide information on the contact tracing investigation. A press release will be released to the public at the end of the investigation and a status update will be provided.

We appreciate all those who have quarantined, self isolated, or been tested to protect our community from this virus. Your actions help keep Lassen County from spreading the virus.

Frequently Asked Questions to the Call Center:

Q: How and where do I register to get a COVID-19 Test?

A: Go to www.lassencares.org and select the registration link. It is also located below.

Q: Who do I talk to reopen my business?

A: Call the COVID-19 Call Center at (530) 251-8100 or complete the Business Readiness Survey. You can find guidance for your business at the resources listed above.

Q: I can't get logged into Verily because the appointments are full, what can I do?

A: Please select any available date and time, arrive at the testing center of your choice, and they will assist you from there.

You can also register in person at the testing site. It just takes a little more time.

If you have having trouble, please call the COVID-19 Call Center at (530) 251-8100.

5 STEPS TO GETTING TESTED THROUGH BASELINE

Getting Tested for COVID-19 in Lassen County during the Drive Thru Clinic

The Lassen County COVID-19 Call Center
Monday – Friday
8:00 am - 5:00 pm

Drive Thru Testing and Routine Testing at Public Health:

Lassen County Public Health is working closely with their partner agencies to bring drive thru testing to the outlying areas of our county. Testing was held in Doyle, Herlong, and Bieber and pictures are shared on the LassenCares Facebook page. Testing for the Westwood area will begin tomorrow. Please see the schedule above for more information.

During the drive thru clinics in Susanville, the Public Health Department was able to test 432 residents. This testing was available to non-residents as well. A total of 1,241 tests have been administered in Lassen County. 1,083 have returned negative.

We will be releasing the number of tests completed during these drive thru clinics. Check LassenCares under the "Testing Information" tab for more information.
