TO REPAIR OR NOT REPAIR?

A repair may not ALWAYS be the best option.

You get honest advice to help you choose the best option for your needs.

You see the cost of repair and replacement up front so you can choose what works best for your budget and timeline.

WAIT, I HAVE QUESTIONS!

? HOW LONG WILL REPAIRS TAKE ?

Most repairs are done between 3-10 business days.

? IF I ORDER A NEW UNIT WHEN WILL I GET IT?

Depends on availability and unit type. If in stock, we offer free same-day to 1-day delivery. Other times it may be a 2-5-day lead time (*more for specialty units).

? I AM CLUELESS, CAN YOU HELP?

Yes! Bring in your unit for inspection. We do our best to gather as much info over the phone and through photos, but a shop inspection will allow us to assess full scope of issues.
