

We, the PRAN Foundation, are a dedicated group of over 250 Indian researchers and technocrats based in India and abroad. Our mission is to uplift and empower the education system in rural India. Established just last year, we have already made significant strides in providing educational opportunities to the underprivileged.

Our Achievements

In our inaugural year, we awarded scholarships to 46 meritorious students from class 9th in the rural district of Ayodhya, Uttar Pradesh. These scholarships support them through their critical educational journey until they pass out of 12th grade.

Upcoming Scholarship Examination 2024

This year, our SAARTHI Scholarship Examination will be held on 18th August 2024. We will select 50 students out of the top 100 based on their examination scores, interview performance, and grace marks for those facing severe parental health issues. This scholarship is exclusively for meritorious and marginalized students, ensuring that only those who truly need and deserve the support receive it.

Our Goal

- For the 2024-2025 academic year, we aim to provide:
- Scholarships to 50 new class 9th students (₹6000 each)
- Continued support to 46 class 10th students who received scholarships last year.
-

How You Can Help

We are raising funds to support these brilliant young minds and foster education in the rural regions of Ayodhya. Every contribution, no matter the size, can make a significant difference in a student's life. Your generosity can help shape the future of these students and pave the way for a brighter tomorrow.

Additional Initiatives

Apart from our scholarship program, we also train master's students to secure research positions abroad, helping them to further their academic and professional careers.
